Maintenance

1. Cleaning the Fan

To ensure optimal performance and hygiene, regularly clean your fan. The fan hood is detachable for easy cleaning.

1. Ensure the fan is turned off and unplugged before cleaning.
2. Gently detach the front fan hood.
3. Wipe the fan blades and the inside of the hood with a soft, damp cloth. Do not immerse the fan in water.
4. Allow all parts to dry completely before reassembling.

2. Storage

When not in use, the fan can be folded back into its compact form for easy storage.

- Ensure the fan is clean and dry.
- Gently push the fan head down into the base until it is fully collapsed.
- Store in a cool, dry place away from direct sunlight.

Troubleshooting

Problem	Possible Cause	Solution
Fan does not turn on.	Battery is depleted or not charged.	Charge the fan fully using the USB-C cable. Ensure the power source is active.
Remote control not working.	Battery in remote is dead or incorrectly inserted. Obstruction between remote and fan.	Replace the AAAA battery in the remote. Ensure clear line of sight to the fan's sensor.
Weak airflow.	Fan blades are dirty. Fan is not on highest setting.	Clean the fan blades and hood as per maintenance instructions. Increase fan speed.
Fan makes unusual noise.	Obstruction in fan blades. Fan not on a stable surface.	Turn off and unplug the fan, then check for any foreign objects. Place the fan on a flat, stable surface.
Difficulty unfolding/folding.	Mechanism is stiff or not aligned.	Ensure you are pulling/pushing directly upwards/downwards. Refer to the setup section for proper technique. Do not force the mechanism.
