Kawada NBPM_080

Kawada Nanoblock Pocket Monster Lizardon DX (NBPM_080) Instruction Manual

This manual provides detailed instructions for the assembly, care, and use of your Kawada Nanoblock Pocket Monster Lizardon DX model.

1. Product Overview

The Kawada Nanoblock Pocket Monster Lizardon DX (NBPM_080) is a miniature building block set designed to construct a detailed model of Lizardon (Charizard) from the Pocket Monster series. This set offers a challenging and rewarding building experience for enthusiasts of all ages.

Image Description: This image displays the fully assembled Kawada Nanoblock Pocket Monster Lizardon DX model, showcasing its intricate design and vibrant colors, particularly the orange body and blue wings. Adjacent to the model is a festive red Christmas gift bag adorned with white snowflakes and a 'Merry Christmas' inscription, tied with a white ribbon.

2. Package Contents

Before beginning assembly, please verify that all components are present in your package. The standard package for the Nanoblock Lizardon DX (NBPM_080) includes:

- Assorted Nanoblock pieces required for the Lizardon DX model.
- One detailed instruction sheet with step-by-step diagrams.

3. Assembly Instructions

General Assembly Guidelines

The assembly of your Nanoblock model requires precision and patience. Always refer to the included instruction sheet for specific, detailed diagrams for each step.

- **Sort Pieces:** Before starting, sort the Nanoblock pieces by color and size. This will significantly speed up the assembly process.
- **Follow Diagrams:** Carefully follow the step-by-step diagrams provided in the instruction sheet. Each diagram illustrates the placement of blocks for a specific layer or section.
- **Layer by Layer:** Nanoblock models are typically built layer by layer from the base upwards. Ensure each layer is complete and secure before proceeding to the next.
- **Secure Connections:** Press each block firmly into place to ensure a stable and durable connection. Loose connections can lead to an unstable model.

Step-by-Step Assembly (General)

1. Unpack all Nanoblock pieces and the instruction sheet from the packaging.
2. Organize the blocks by color and type into separate containers or areas to make them easily accessible.
3. Begin by constructing the base of the Lizardon model as shown in the initial steps of your instruction sheet.
4. Carefully follow the diagrams, attaching blocks layer by layer, paying close attention to the orientation and position of each piece.
5. If a particular step appears unclear, review the preceding and subsequent diagrams for additional context.
6. Continue building until all sections are complete and securely joined, forming the final Lizardon DX model.

4. Display and Handling

Once fully assembled, your Nanoblock Lizardon DX model is ready for display. To ensure its longevity and appearance:

- **Placement:** Place the model on a stable, flat surface where it is unlikely to be knocked over.
- **Environment:** Avoid placing the model in direct sunlight for extended periods, as this may cause colors to fade over time.
- **Handling:** Handle the model with care, especially when moving it, to prevent pieces from detaching.

5. Maintenance and Care

Cleaning Your Model

To maintain the pristine appearance of your Nanoblock Lizardon DX model:

- **Dust Removal:** Use a soft, dry brush (such as a clean makeup brush or a soft paintbrush) or a can of compressed air to gently remove dust from the model's surface.
- **Spot Cleaning:** For more stubborn dirt, lightly dampen a soft cloth with water and gently wipe the affected area. Immediately follow with a dry cloth to remove any moisture.
- **Avoid Chemicals:** Do not use harsh cleaning chemicals, abrasive materials, or excessive water, as these can damage the plastic blocks or cause discoloration.

6. Troubleshooting

Common Issues and Solutions

- **Missing Pieces:** If you discover any missing Nanoblock pieces upon opening the package, please contact Kawada customer support. Provide the model number (NBPM_080) and a clear description of the missing piece(s) for assistance.
- **Difficulty Assembling:** If you encounter difficulty in assembling a particular section, re-examine the instruction diagrams carefully. Ensure that all pieces are correctly oriented and fully pressed into place. Sometimes, using a small tool like tweezers can help with the precise placement of tiny blocks.
- **Model Instability:** If the assembled model feels unstable, review the connections of the most recently added sections. Ensure all blocks are securely interlocked. Re-examine previous steps if necessary to identify any loose connections.

7. Specifications

- **Brand:** Kawada
- **Model Number:** NBPM_080
- **Product Type:** Nanoblock Building Set
- **ASIN:** B0DLKKX64M
- **First Available Date:** October 31, 2024
