#### 4. SETUP (ASSEMBLY INSTRUCTIONS)

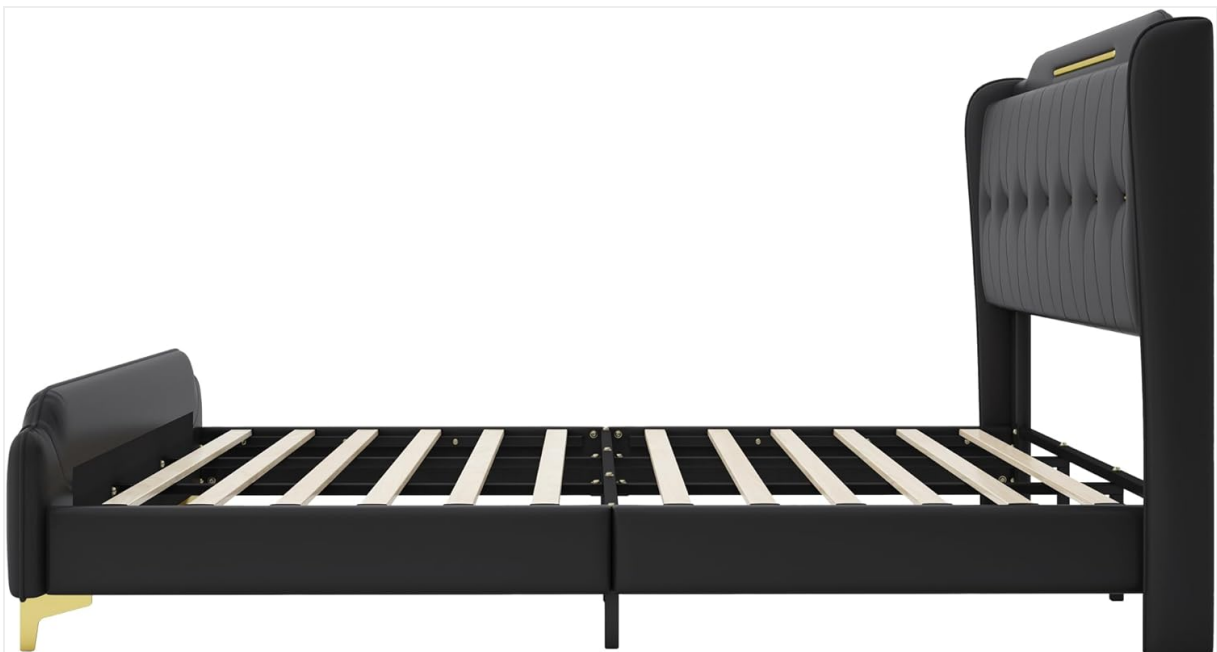

Assembly is required. It is recommended that two adults assemble this bed frame. Clear instructions and all necessary tools are included.

1. **Unpack Components:** Carefully unpack all parts and hardware from the packaging. Place them on a clean, soft surface to prevent scratches.
2. **Assemble Headboard:** Connect the headboard sections if they are separate. Secure with the provided hardware.
3. **Attach Side Rails:** Connect the side rails to the headboard and footboard using the designated bolts and nuts. Ensure connections are firm but do not overtighten initially.

4. **Install Center Support:** Attach the metal center support beam and its legs to the bed frame. This provides crucial stability.
5. **Place Wooden Slats:** Lay the wooden slats across the side rails. Secure them in place according to the instructions, typically by inserting them into pre-drilled holes or using plastic caps.
6. **Tighten All Hardware:** Once all components are in place, go back and securely tighten all bolts and screws.
7. **Attach Decorative Legs:** Install the decorative metal legs to the corners of the bed frame.

Once assembled, your bed frame is ready for use.

- **Mattress Placement:** Place your King-size mattress directly onto the wooden slats. A box spring is not required.
- **Weight Distribution:** Ensure weight is distributed evenly across the bed frame. Avoid concentrating heavy loads in one small area.
- **Underbed Clearance:** The bed frame offers approximately 4 inches of underbed clearance, suitable for robotic vacuums or minimal storage.

## 6. MAINTENANCE

To keep your bed frame in optimal condition:

- **Cleaning:** Wipe clean with a damp cloth. Avoid harsh chemicals or abrasive cleaners that may damage the faux leather or finish.
- **Regular Checks:** Periodically inspect all connections (bolts, screws) to ensure they are tight. Retighten if necessary.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight may cause the faux leather to fade or crack over time.

## 7. TROUBLESHOOTING

If you encounter issues with your bed frame, consider the following:

- **Squeaking Noises:**
  - Ensure all bolts and screws are securely tightened. Loose connections are a common cause of

squeaking.

- Check if the wooden slats are properly seated and not rubbing against the frame.

- **Instability:**

- Verify that the bed frame is on a level surface.
- Re-check all assembly steps to ensure no parts were missed or incorrectly installed.
- Confirm the center support legs are making proper contact with the floor.

- **Damaged Parts:** If any part is damaged or broken, discontinue use and contact customer support for replacement parts.
