OPERATING INSTRUCTIONS

1. Lift-Up Underbed Storage

To access the hidden storage compartment, gently lift the mattress platform from the foot of the bed. The hydraulic system will assist in raising the platform and holding it securely in an open position. This provides ample space for storing seasonal clothes, bedding, or other items. A base sheet is included to protect stored items from dust.

MAINTENANCE

- **Cleaning:** Regularly wipe down the faux leather surfaces with a soft, damp cloth. Avoid using abrasive cleaners or harsh chemicals, as these can damage the material.
- **Fastener Check:** Periodically check and tighten all screws, bolts, and connections to ensure the bed frame remains stable and secure. Loose fasteners can lead to squeaking or instability.
- **Base Sheet:** Ensure the base sheet is properly attached with its Velcro fasteners to keep stored items dust-free and prevent it from detaching.
- **Electrical Components:** Keep the power outlet and RGB light components dry and free from dust. Do not attempt to repair electrical parts yourself.

TROUBLESHOOTING

- **Hydraulic System Not Lifting/Holding:** If the hydraulic cylinders do not lift or hold the mattress platform properly, ensure the mattress is correctly positioned and its weight is within the recommended limits. If the issue persists, contact customer support.
- **RGB Lights Malfunctioning:** If the RGB lights turn on randomly, flicker, or do not respond to controls, check the remote control battery. Ensure the light strip connections are secure and the power adapter is functioning correctly. If using the app, verify Bluetooth connection.
- **Base Sheet Detachment:** If the base sheet detaches from the Velcro, re-secure it firmly. Avoid overloading the underbed storage, which can put strain on the fasteners.
- **Squeaking Noises:** Squeaking often indicates loose connections. Re-tighten all screws and bolts on the frame, especially around the joints and slat supports.
