U.S. GENERAL Mini Steel Toolbox User Manual

Brand: U.S. GENERAL | Model: 72436

INTRODUCTION

The U.S. GENERAL Mini Steel Toolbox is designed for organizing and storing a variety of hand tools and accessories. Its compact size makes it suitable for use in various environments, including workshops, homes, or offices. This manual provides essential information for the proper setup, operation, and maintenance of your toolbox.

Image: The U.S. GENERAL Mini Steel Toolbox, featuring its two drawers and a convenient top storage compartment, designed for efficient organization.

FEATURES

- **Capacity:** Holds up to 10 lb. total, with 5 lb. per drawer, ideal for organizing various hand tools and accessories.
- **Durability:** Features a tough powder-coated gloss finish for wear and rust resistance.
- **Easy Access:** Equipped with durable ball bearing drawer slides for smooth opening and closing.
- **Top Storage:** Convenient top compartment remains open at over 90 degrees for easy organization.
- **Secure Locking:** Includes a magnetic drawer locking mechanism for added security.
- **Interior Protection:** Precut, nonslip PVC drawer liners help keep tools in place and prevent scratching.
- **Corrosion Resistance:** Aluminum drawer trim is corrosion-resistant.

SETUP

Unpacking

Carefully remove the toolbox from its packaging. Inspect the unit for any signs of damage that may have occurred during transit. Retain packaging materials for future transport or if return is necessary.

Placement

Place the toolbox on a stable, level surface capable of supporting its weight when fully loaded. Ensure adequate clearance around the toolbox for opening drawers and the top lid without obstruction.

OPERATING INSTRUCTIONS

Drawer Operation

To open a drawer, gently pull the handle. The ball bearing slides ensure smooth operation. To close, push the drawer firmly until the magnetic locking mechanism engages, securing the drawer in place. Ensure all drawers are fully closed to prevent accidental opening.

Top Compartment Use

The top compartment lid opens to over 90 degrees, providing easy access to the storage area. This space is ideal for frequently used tools or larger items. Close the lid securely when not in use to protect contents.

MAINTENANCE

Cleaning

Clean the exterior of the toolbox with a soft, damp cloth and mild detergent. Avoid abrasive cleaners or solvents that could damage the powder-coated finish. The PVC drawer liners can be removed and wiped clean as needed.

Lubrication

Periodically inspect the ball bearing drawer slides. If drawers become stiff or difficult to operate, apply a small amount of silicone spray or light machine oil to the slides. Do not over-lubricate.

TROUBLESHOOTING

Problem	Possible Cause / Solution
Drawers stick or are difficult to open/close.	Check for obstructions within the drawer or along the slides. Lubricate the ball bearing slides as described in the Maintenance section.
Magnetic lock not engaging.	Ensure the drawer is pushed completely closed. Verify no debris is interfering with the magnetic mechanism.
Minor scratches or dents on exterior.	Cosmetic damage may occur during shipping or use. This typically does not affect the structural integrity or functionality of the toolbox.

SPECIFICATIONS

Attribute	Detail
Brand	U.S. GENERAL

Attribute	Detail
Model Number	72436
Material	Alloy Steel
Color	Black
Product Dimensions (L x W x H)	11" x 6" x 6"
