Ytonet 986600

Ytonet Moving Straps (Model 986600) Instruction Manual

Brand: Ytonet

Model: 986600

PRODUCT OVERVIEW

The Ytonet Moving Straps provide a 2-person lifting and moving system designed to simplify the transportation of heavy and bulky items. Featuring padded back support and adjustable straps, this system helps distribute weight evenly, reducing strain on your back and arms. It is ideal for moving furniture, appliances, mattresses, and other heavy objects up to 800 lbs.

Key Features:

- **Ergonomic Design:** Foam padded back support and 3D shoulder cushions distribute pressure, reducing strain.
- **Reduced Strain:** Transfers weight to stronger muscles (legs and shoulders) to minimize arm and back strain.
- **Two-Way Usage:** Offers both hand-carry and shoulder-mounted options for versatile lifting.
- **Premium Materials:** Constructed with high-density polyester and military-grade metal buckles for secure lifting up to 800 lbs.
- **Universal Size:** Adjustable straps (80-135 inches) accommodate different heights and various item sizes.

SETUP INSTRUCTIONS

Follow these steps to properly set up your Ytonet Moving Straps for safe and efficient lifting.

1. **Wear the Harness:** Each person should wear one harness. Slide your arms through the shoulder straps so the padded back support rests comfortably on your back.
2. **Secure Chest Buckle:** Fasten the anti-slip chest buckle at the front to ensure the harness is secure and stable.
3. **Position Lifting Straps:** Place the two long lifting straps on the floor, parallel to each other, or cross them in an 'X' shape depending on the item's stability and your preferred lifting method.
4. **Slide Straps Under Item:** Carefully slide the lifting straps underneath the item you intend to move. Ensure the straps are centered and provide adequate support.
5. **Attach to Harness:** Thread the ends of the lifting straps through the metal buckles on the front of your harness. Adjust the length to achieve a snug fit when you bend your knees and prepare to lift.

2 HARNESSSES & 2 LIFTING STRAPS

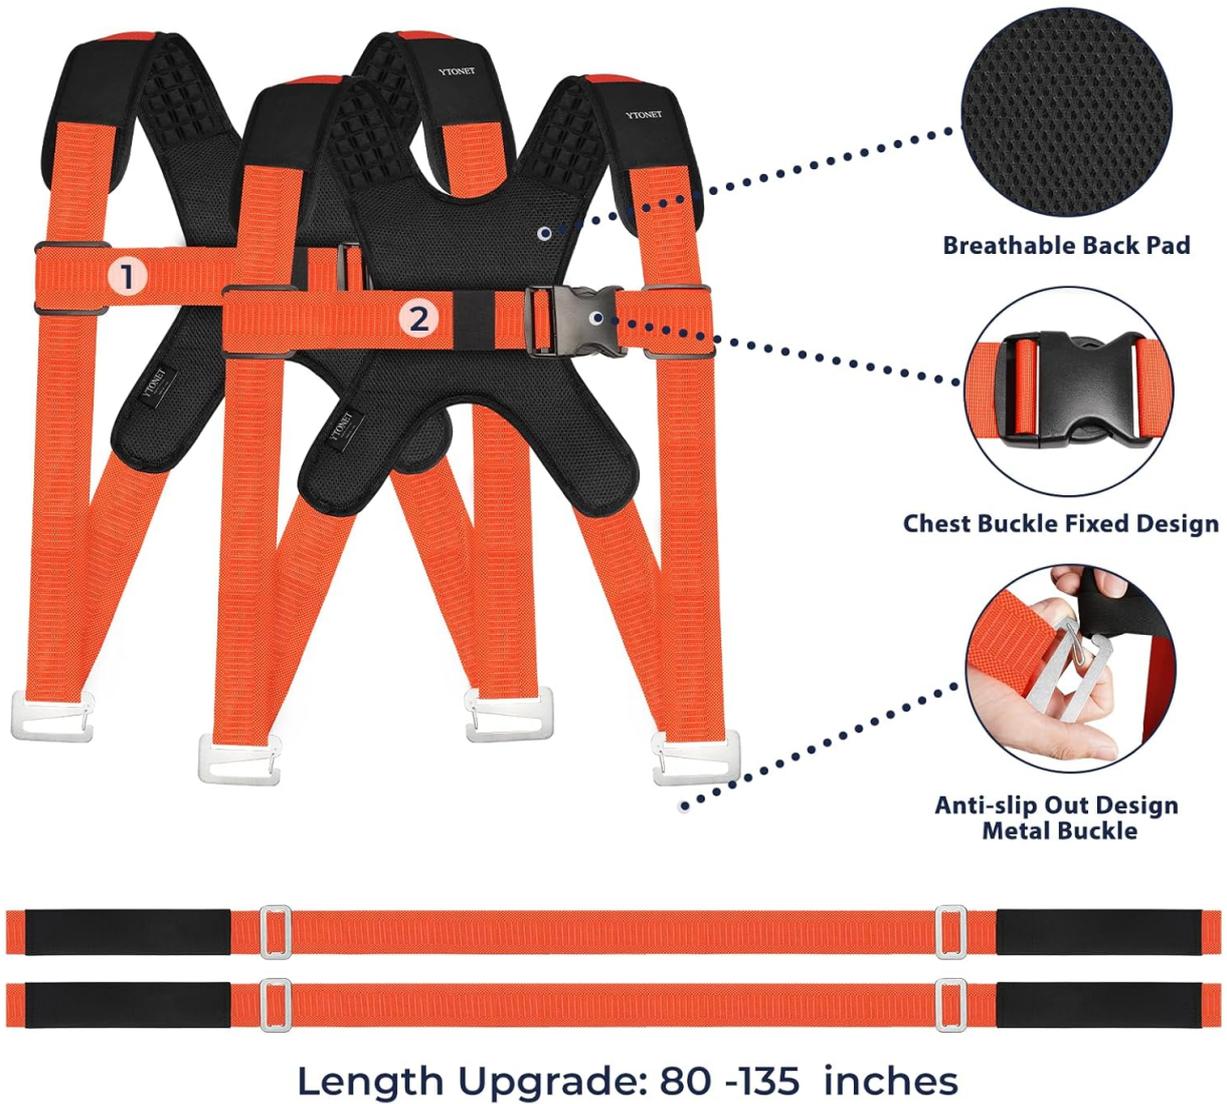

Image: Ytonet Moving Straps showing two harnesses and two lifting straps. Details highlight the breathable back pad, chest buckle fixed design, and anti-slip metal buckle. The straps are adjustable from 80-135 inches.

STRESS-RELIEVING BACK SUPPORT VEST

lift up to 800lbs, sponge back support for comfort

**3D Cushion Particles

4 SIMPLE STEPS - READY IN SECONDS

Easy to Operate and Anti-Slip Design

Step1

Wear the vest, and adjust to a comfortable position

Step2

Crossing the moving straps, place the item on straps

Step3

Slide the strap into the metal buckle

Step4

Lift and move as the pro

Image: A four-panel visual guide demonstrating the setup process: Step 1: Wear the vest and adjust. Step 2: Cross moving straps, place item on straps. Step 3: Slide strap into metal buckle. Step 4: Lift and move.

Video: This video demonstrates the correct way to wear the moving straps, including securing the chest buckle and threading the lifting straps through the metal buckles. It shows how to adjust the straps for optimal fit and balance.

OPERATING INSTRUCTIONS

Proper lifting technique is crucial to prevent injury. Always lift with your legs, not your back.

1. **Coordinate with Partner:** Ensure both individuals are ready and communicate clearly before lifting.
2. **Bend Knees, Straight Back:** Squat down close to the item, keeping your back straight.
3. **Lift Simultaneously:** Push up with your legs, lifting the item together with your partner. Maintain a straight back throughout the lift.
4. **Maintain Balance:** Keep the item as level as possible. For stairs, one person may need to be higher or lower, adjusting their squat depth to keep the item balanced.
5. **Arm-Mounted vs. Shoulder-Mounted:** Choose the method that provides the best control and comfort for the specific item. Arm-mounted is good for smaller, lighter items, while shoulder-mounted is better for larger,

heavier objects to leverage leg strength.

6. **Lowering the Item:** Reverse the lifting process. Squat down with a straight back, using your legs to slowly lower the item to its new position.

NO MORE BACK PAIN!

Image: A visual comparison showing the difference in lifting a sofa with and without moving straps. Without straps, a person experiences back pain. With Ytonet straps, two people lift the sofa easily and safely.

2 WAYS TO USE

Image: Two panels illustrating the two ways to use the moving straps: arm-mounted for smaller items like a cabinet, and shoulder-mounted for larger items like a sofa.

LIFT HEAVY ITEMS SAFE AND EASY

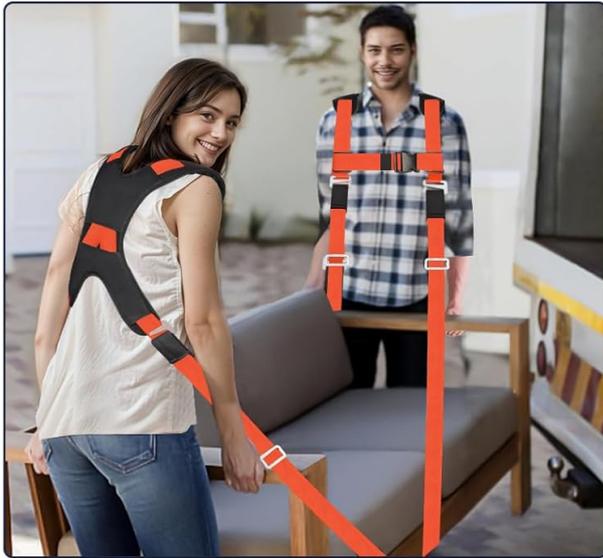

Image: A collage showing various scenarios of people using the Ytonet Moving Straps to lift and transport heavy items such as sofas, refrigerators, and shelving units, emphasizing safety and ease.

MAINTENANCE

To ensure the longevity and continued performance of your Ytonet Moving Straps, follow these maintenance guidelines:

- **Cleaning:** Wipe down straps and harnesses with a damp cloth after each use to remove dirt and debris. For deeper cleaning, hand wash with mild soap and water. Air dry completely before storage.
- **Inspection:** Regularly inspect straps, buckles, and padding for any signs of wear, fraying, cuts, or damage.

Do not use if any components are compromised.

- **Storage:** Store the moving straps in a cool, dry place away from direct sunlight and extreme temperatures. Keep them neatly rolled or folded to prevent tangling and damage.

TROUBLESHOOTING

If you encounter any issues while using your Ytonet Moving Straps, refer to the following common problems and solutions:

- **Straps Slipping:** Ensure the straps are threaded correctly through the metal buckles (back then front) and are tightened sufficiently. The anti-slip design should prevent excessive movement.
- **Discomfort During Use:** Verify that the padded back support and shoulder cushions are positioned correctly. Adjust the strap length to ensure the weight is distributed across your shoulders and legs, not just your arms or lower back.
- **Difficulty Lifting Heavy Items:** Re-evaluate the item's weight and your combined lifting capacity. Ensure proper squatting technique and coordination with your partner. For extremely heavy items, consider professional movers.
- **Item Unstable:** Make sure the straps are centered under the item and adjusted to an appropriate length. Communicate with your partner to maintain synchronized movement and balance.

PRODUCT SPECIFICATIONS

Specification	Detail
Brand	Ytonet
Model	986600
Size	Standard
Material	Polyester, Alloy Steel (Fastener)
Color	Orange
Load Capacity	800 Pounds
Tensile Strength	800 Pounds
Number of Pieces	1 (Set includes 2 harnesses, 2 lifting straps)
Product Dimensions	130"L x 4.5"W (Straps adjustable from 80-135 inches)
Item Weight	2.62 pounds

WARRANTY INFORMATION

Ytonet products are manufactured to high-quality standards. For specific warranty details regarding your moving straps, please refer to the packaging or contact Ytonet customer support directly. Keep your proof of purchase for any warranty claims.
