## 6. TROUBLESHOOTING

---

This section addresses common concerns and provides solutions.

Problem	Possible Cause	Solution
Desk feels wobbly or unstable.	Loose fasteners; uneven floor.	Ensure all screws and bolts are tightened. Adjust desk levelers if present, or place shims under legs on uneven surfaces.
Drawers do not slide smoothly.	Improper alignment during assembly; debris in glides.	Recheck assembly steps for drawer slides and ensure they are correctly installed and aligned. Clean glides of any dust or debris.
Desktop seams are visible or wood grain doesn't align perfectly.	This is a design feature of the 3-piece desktop.	This is normal and intentional to prevent shipping damage and ease assembly. It does not affect the desk's structural integrity.
Missing parts or damaged components upon arrival.	Manufacturing or shipping error.	Contact Bestier customer support immediately with your purchase details and a description of the issue.
