Baseus BLD140-US

Baseus Blade 140W 6-in-1 Charging Station User Manual

Model: BLD140-US

Introduction

Welcome to the user manual for your Baseus Blade 140W 6-in-1 Charging Station. This compact and powerful device is designed to efficiently charge multiple electronic devices simultaneously, whether for work, travel, or daily use. It integrates various charging ports and smart features to provide a convenient and safe power solution.

Product Features

6-in-1 Efficient Power Solution

This charging station offers versatile power options with 3 USB-C ports, 1 USB-A port, and 2 AC outlets, allowing you to power up to 6 devices concurrently.

devices simultaneously.

140W Super Fast Charging

Equipped with next-generation GaN technology, the Baseus Blade delivers up to 140W of power, capable of rapidly charging high-demand devices like a 16-inch MacBook Pro to 62% in approximately 30 minutes.

Super Slim & Portable Design

With an innovative stacked design and pop-up AC outlets, this power strip is remarkably slim (0.68 inches thick), making it highly portable for travel. It features a 5ft (1.5m) detachable flat cord for easy packing and wide voltage compatibility (100V~240V).

Dynamic Smart Display

The built-in digital display provides real-time charging data, showing voltage, current, and power output for each port, keeping you informed about your charging status at a glance.

Setup

Unpacking

Carefully remove all components from the packaging: the Baseus Blade 6-in-1 Slim Power Strip 140W, the 5ft (1.5m) detachable flat cord, and the user guide.

Your browser does not support the video tag.

Video: This video demonstrates the unboxing and initial setup of the Baseus Blade 140W Charging Station, showing its compact design and various ports.

Connecting to Power

Connect the detachable 5ft flat cord to the designated port on the charging station. Plug the other end of the cord into a standard AC wall outlet (100V~240V compatible).
The digital display will illuminate, indicating the device is powered on and ready for use.

Operating Instructions

Charging Devices

To charge your devices, simply connect them to the available USB-C, USB-A, or pop-up AC outlets. The smart display will show the real-time power output for each connected device.
For optimal 140W charging, especially for devices like the 16-inch MacBook Pro, use the designated USB-C port (usually C1 or C2, refer to the display for 140W output) and the original charging cable.

Image: The Baseus Blade Charging Station shown integrating 6 charging needs, illustrating its compact design replacing multiple chargers.

Using the Dynamic Display

The display cycles through total power output and individual port power details. Press the circular button on the device to manually cycle through display modes or to turn the display off for undisturbed environments.

Maintenance

Cleaning

Disconnect the charging station from the power source before cleaning. Use a soft, dry cloth to wipe the surface. Avoid using liquid cleaners or abrasive materials.

Storage

When not in use, store the charging station in a cool, dry place away from direct sunlight and extreme temperatures. The detachable cord allows for compact storage.

Troubleshooting

Device Not Charging

- Ensure the charging station is properly plugged into a live AC outlet.
- Check if the detachable cord is securely connected to the charging station.
- Verify that your device's charging cable is correctly inserted into both the device and the charging station port.
- Try a different port on the charging station or a different charging cable.

Display Not Working

- Ensure the charging station is connected to a power source. The display only activates when powered.
- Press the circular button on the device to activate or cycle through display modes.

Slow Charging

- Confirm that your device and cable support fast charging protocols (e.g., PD 3.1 for 140W).
- The total power output is shared among all active ports. If multiple high-power devices are connected, the charging speed for individual devices may be reduced.
- Ensure the cable used is capable of handling the desired wattage.

Specifications

Feature	Detail
Brand	Baseus
Model Number	BLD140-US
Total Power Output	140W Max
Ports	3x USB-C, 1x USB-A, 2x AC Outlets
Input Voltage	100V~240V
