## 3. SETUP

### 3.1 Battery Installation

The ZWP Replacement Remote Control requires two AAA batteries (not included). Follow these steps to install the batteries:

1. Locate the battery compartment cover on the back of the remote control.
2. Slide the cover downwards or press the release tab (if present) to open the compartment.
3. Insert two AAA batteries, ensuring the positive (+) and negative (-) terminals align correctly with the markings inside the compartment.
4. Replace the battery compartment cover until it clicks securely into place.

Once batteries are installed, the remote control is ready for use; no programming is required.

## 6. TROUBLESHOOTING

### 6.1 Remote Control Not Responding

- **Check Batteries:** Ensure batteries are correctly installed with the correct polarity (+/-). Replace old or depleted batteries with new AAA batteries.
- **Line of Sight:** Make sure there are no obstructions between the remote control and the vibration plate's receiver.
- **Distance:** Confirm you are within the operational range of approximately 8 meters.
- **Compatibility:** Double-check that your vibration plate model is listed as compatible or that your original remote matches the appearance of this replacement.

### 6.2 Intermittent Operation

- **Battery Level:** Low battery power can cause inconsistent performance. Replace batteries.
- **Environmental Interference:** Strong electromagnetic fields from other electronic devices might interfere with the signal. Try operating the remote in a different location or away from such devices.
