## 4. OPERATING INSTRUCTIONS

---

### 4.1. Mechanical Blue Switches

The keyboard features responsive blue mechanical switches, providing tactile feedback and an audible click sound with each keystroke. This design enhances typing accuracy and speed, making it suitable for both gaming and extensive typing tasks.

### **4.3. Multimedia Shortcut Keys**

The keyboard includes 12 dedicated multimedia shortcut keys. These keys provide quick access to functions such as calculator, media playback controls, volume adjustment, and email, thereby enhancing productivity and convenience.

### **4.4. Anti-Ghosting Feature**

The anti-ghosting feature ensures that multiple key presses are registered accurately and simultaneously. This is particularly beneficial in gaming scenarios where complex key combinations are often required.

## 5. MAINTENANCE

---

To ensure the longevity and optimal performance of your ASHATA Mechanical Gaming Keyboard, follow these maintenance guidelines:

- **Cleaning Keycaps:** The keycaps are pluggable, allowing for easy removal and cleaning. Use the included keycap puller to carefully remove keycaps. Clean them with a soft, damp cloth or mild cleaning solution. Ensure keycaps are completely dry before reattaching.
- **Cleaning the Keyboard Base:** Use compressed air to remove dust and debris from between the switches. Wipe the surface of the keyboard base with a soft, dry cloth.
- **Avoid Liquids:** Do not spill liquids on the keyboard. In case of accidental spills, immediately disconnect the keyboard from your computer and allow it to dry completely before reconnecting.
- **Storage:** When not in use for extended periods, store the keyboard in a clean, dry environment away from direct sunlight and extreme temperatures.

## 6. TROUBLESHOOTING

---

If you encounter issues with your ASHATA Mechanical Gaming Keyboard, please refer to the following common troubleshooting steps:

- **Keyboard Not Responding:**

- Ensure the USB cable is securely connected to both the keyboard and the computer.
- Try connecting the keyboard to a different USB port on your computer.
- Restart your computer.

- **Backlighting Not Working:**

- Check if the backlighting is turned off or set to the lowest brightness level using the keyboard's control functions.
- Ensure the keyboard is properly connected and receiving power.

- **Keys Not Registering:**

- Remove the affected keycap using the keycap puller and check for any obstructions or debris around the switch.
- Gently re-seat the keycap.

If these steps do not resolve the issue, please contact ASHATA customer support for further assistance.
