TROUBLESHOOTING

If you encounter any issues with your sofa bed, refer to the following common problems and solutions.

Problem	Possible Cause	Solution
Sofa feels wobbly or unstable.	Legs are not tightened properly or uneven floor.	Ensure all 9 legs are securely tightened. If the floor is uneven, use furniture pads or shims under the legs to level the sofa.
Backrest mechanism is stiff or not adjusting smoothly.	Mechanism might be obstructed or require lubrication.	Ensure no fabric or debris is caught in the mechanism. Apply a silicone-based lubricant to the moving parts if necessary (avoid oil-based lubricants on fabric).

Problem	Possible Cause	Solution
Sofa sections do not connect properly.	Misalignment of connectors.	Re-align the connectors carefully and apply firm, even pressure until they click into place. Check for any obstructions.
