bunoju MWC001

Magnetic Windshield Cover

Model: MWC001 | Brand: bunoju

INTRODUCTION

The bunoju Magnetic Windshield Cover is designed to provide comprehensive protection for your vehicle's windshield throughout the year. This cover effectively shields against various weather conditions, including snow, ice, frost, and harmful UV rays. Its robust construction and thoughtful design ensure ease of installation and reliable performance, helping to maintain your vehicle's interior temperature and prevent windshield damage.

This manual provides detailed instructions for the proper setup, operation, and maintenance of your Magnetic Windshield Cover to ensure optimal performance and longevity.

WHAT'S IN THE BOX

- 1 x Magnetic Windshield Cover
- 1 x Car Snow Brush (included with 1PCS/2PCS package)

SETUP AND INSTALLATION

Follow these steps to properly install your Magnetic Windshield Cover:

1. **Unfold the Cover:** Carefully unfold the windshield cover and lay it flat.
2. **Position on Windshield:** Place the cover over your vehicle's front windshield, ensuring it covers the entire glass surface. The side mirror covers should align with your vehicle's side mirrors.
3. **Secure with Magnets:** The cover features 5 integrated magnets. Position these magnets to adhere firmly to your vehicle's hood, ensuring the cover is securely held in place and resistant to wind.
4. **Attach Side Mirror Covers:** Slip the reflective side mirror covers over your vehicle's side mirrors. These covers provide additional protection and feature reflective stripes for enhanced visibility.
5. **Adjust for Fit:** Ensure the elastic edges of the cover are snug against your windshield and the cover is taut to prevent flapping in windy conditions.

No longer afraid of heavy snow

OPERATING INSTRUCTIONS

The Magnetic Windshield Cover is designed for versatile use across different seasons:

- **Winter Protection (Snow, Ice, Frost):** Install the cover as described in the Setup section before anticipated snowfall or freezing temperatures. The cover will prevent snow, ice, and frost from accumulating directly on your windshield, making morning clear-off quick and easy. Simply remove the cover to reveal a clean windshield.
- **Summer Protection (UV Sunshade):** During hot, sunny weather, install the cover to act as a sunshade. The aluminum film material reflects sunlight, significantly reducing the temperature inside your vehicle and protecting your dashboard and interior from UV damage.

Image: The windshield cover installed on a car, illustrating its reflective properties against sunlight, preventing sun exposure.

Image: View from inside a car with the windshield cover installed, showing how it blocks sunlight and keeps the interior dark, contributing to a cooler cabin temperature.

THE COOLING EFFECT IS MORE OBVIOUS

Sunlight does not penetrate into the car, and the interior of the car is dark as night, which significantly reduces the temperature inside the car.

Image: A person removing the windshield cover from a car, demonstrating how accumulated snow is lifted away with the cover, leaving the windshield clear.

MAINTENANCE AND CARE

- **Cleaning:** If the cover becomes dirty, wipe it clean with a damp cloth. For stubborn dirt, a mild soap solution can be used, followed by rinsing with water. Ensure the cover is completely dry before folding and storing to prevent mildew.
- **Storage:** The cover is designed to fold compactly. After use, fold it neatly and store it in your vehicle's trunk or glove box. Avoid storing the cover when wet or dirty to maintain its condition.
- **Inspection:** Periodically inspect the cover for any signs of wear, tear, or damage to the material or magnets. Replace if significant damage is observed to ensure continued effective protection.

TROUBLESHOOTING

- **Cover Not Staying Securely:** Ensure all 5 magnets are properly aligned and making full contact with the vehicle's hood. Check for any debris or ice preventing proper magnetic adhesion. Adjust the elastic edges for a

tighter fit.

- **Incomplete Windshield Coverage:** Verify that the correct size cover (Car or SUV) was purchased for your vehicle type. Adjust the cover's position to ensure it extends fully across the windshield.
- **Ice/Snow Under Cover:** Ensure the cover is installed tightly against the windshield, leaving no gaps for snow or ice to accumulate underneath. Remove any existing snow or ice from the windshield before installation.

WARRANTY AND SUPPORT

Your bunaju Magnetic Windshield Cover comes with a **30-day refund/replacement policy** from the date of purchase. If you encounter any issues or have questions regarding your product, please contact the seller directly through Amazon's messaging system. We aim to respond to all inquiries within 24 hours.

For further assistance or to report a defect, please provide your order number and a detailed description of the issue when contacting support.
