Remote Control User Manual

Compatible with Roadstar and Reakosound Car Stereo Receivers

Brand: Generic

1. INTRODUCTION

This manual provides essential information for the proper setup, operation, and maintenance of your new replacement remote control. This remote is designed to be compatible with various car stereo receiver models, including Roadstar RS-2751BR, RS-2750BR, RS-2714BR, RS-2605BR, and Reakosound 820S.

Please ensure your original remote control is identical to the one shown in this manual for full compatibility. While this is a direct replacement, some minor function variations may exist compared to your original unit.

Figure 1: Front view of the remote control, showing all buttons and their labels. The remote is white with a black frame and features blue, red, and green accents on its buttons.

2. SETUP

2.1 Battery Installation

The remote control requires one CR2025 coin cell battery for operation. Follow these steps to install or replace the battery:

1. Locate the battery compartment on the back of the remote control.
2. Use a small coin or a flat tool to gently twist the battery cover counter-clockwise to the 'OPEN' position, as indicated by the arrow.
3. Insert the CR2025 battery with the positive (+) side facing upwards.
4. Align the battery cover and twist it clockwise to the 'CLOSE' position until it clicks securely into place.

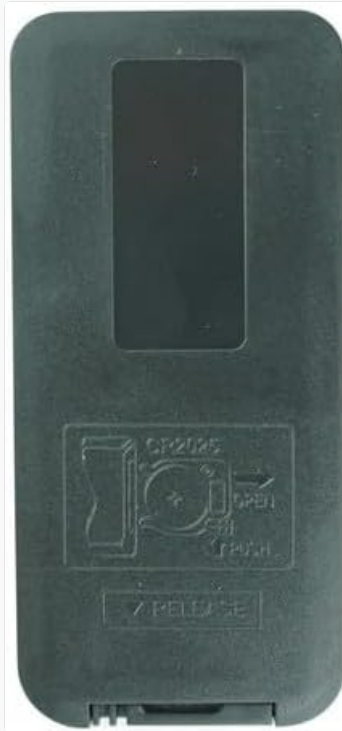

Figure 2: Back view of the remote control, illustrating the battery compartment and the instructions for opening and closing it for CR2025 battery installation. A small clip accessory is also visible.

3. OPERATING INSTRUCTIONS

Point the remote control directly at the infrared (IR) receiver on your car stereo. Ensure there are no obstructions between the remote and the receiver.

Figure 3: An angled perspective of the remote control, providing a clearer view of the button arrangement and their functions.

3.1 Button Functions

Button	Function
Power	Turns the car stereo receiver On/Off.
MODE	Switches between different audio sources (e.g., Radio, USB, AUX).
Mute	Mutes or unmutes the audio output.
BAND	Selects radio bands (e.g., FM1, FM2, AM).
VOL+ / VOL-	Increases / Decreases the volume level.
AMS	Automatic Memory Store / Scan.
◀◀ / ▶▶	Previous / Next track or station.
SEL	Selects menu options or enters settings.
EQ	Cycles through equalizer presets.
DISP	Changes display information.
1/▶ 	Play/Pause (for media playback).
2/INT	Intro scan (plays first few seconds of each track).
3/RPT	Repeat playback mode.
4/RDM	Random/Shuffle playback mode.
5/-10 DIR-	Skips back 10 tracks/files or navigates folders.
6/+10 DIR+	Skips forward 10 tracks/files or navigates folders.

4. MAINTENANCE

4.1 Cleaning

To clean the remote control, use a soft, dry cloth. For stubborn dirt, slightly dampen the cloth with water or a mild, non-abrasive cleaner. Do not use harsh chemicals, solvents, or abrasive cleaning pads, as these can damage the remote's surface or internal components.

4.2 Storage

When not in use for extended periods, store the remote control in a cool, dry place away from direct sunlight and extreme temperatures. If the remote will not be used for several months, it is advisable to remove the battery to prevent leakage and potential damage.

5. TROUBLESHOOTING

5.1 Common Issues and Solutions

- **Remote not responding:**
 - Check if the battery is installed correctly with the correct polarity (+/-).
 - Replace the CR2025 battery with a new one.
 - Ensure there are no obstructions between the remote and the car stereo's IR receiver.
 - Verify that the remote is pointed directly at the receiver.
- **Limited range or intermittent response:**
 - Replace the battery. A weak battery can reduce the remote's effective range.
 - Ensure the IR receiver on the car stereo is clean and free from dust or debris.
- **Some functions not working:**
 - While this remote is a replacement, not all functions may be identical to your original remote. Refer to your car stereo's original manual for specific function details.
 - Ensure your car stereo model is listed as compatible in the product title. If your model is not listed, full compatibility cannot be guaranteed.

6. SPECIFICATIONS

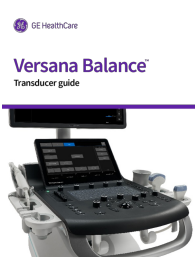

- **Product Type:** IR Replacement Remote Control
- **Color:** Black
- **Battery Type:** 1 x CR2025 Coin Cell Battery (included)
- **Max Number of Supported Devices:** 1
- **Compatible Devices:** Roadstar RS-2751BR, RS-2750BR, RS-2714BR, RS-2605BR, Reakosound 820S Car Stereo Receivers
- **Special Features:** Ergonomic design, direct IR replacement

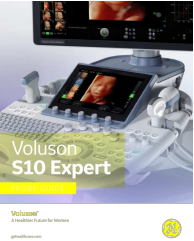

7. WARRANTY AND SUPPORT

This product is an aftermarket replacement remote control. For any doubts or issues not covered in this manual, please contact the seller directly for assistance. It is recommended to check your car stereo's original manual for correct remote control compatibility and functions before purchase.

Furnace Airpacer Board Kit

INSTALLATION INSTRUCTIONS

**FAILURE TO READ AND FOLLOW ALL INSTRUCTIONS CAREFULLY
MAY RESULT IN INSTALLING OR OPERATING THIS CONTROL COULD CAUSE
PERSONAL INJURY AND/OR PROPERTY DAMAGE.**

DESCRIPTION

The F50N02-820 is a Furnace Airpacer Board kit and is used when replacing Furnace Ignition.

Parts Included:

- 4000-400 Airpacer Panel
- 400-100 5 Pin Wiring Airpacer Harness
- 250-100 5 Pin Wiring, Airpacer Harness
- 250-100 5 Pin Wiring, Airpacer Harness
- Installation Instruction Sheet

Part	Part Number	Part Description
4000-400	4000-400	4000-400 Airpacer Panel
400-100	400-100	400-100 5 Pin Wiring Airpacer Harness
250-100	250-100	250-100 5 Pin Wiring, Airpacer Harness
250-100	250-100	250-100 5 Pin Wiring, Airpacer Harness
250-100	250-100	250-100 5 Pin Wiring, Airpacer Harness
250-100	250-100	250-100 5 Pin Wiring, Airpacer Harness

TEMPERATURE RANGE

10 to 120°F to 140°F (3°C to 60°C)

HUMIDITY RANGE

10 to 90% RH (30 to 90% RH)

ASSEMBLY OPTIONS

See Installation Sheet

NOTING AND WARNING

1. Always wear or install an approved safety harness and fall protection when working on the furnace.
2. Before the furnace is started, always be sure the furnace is properly grounded. The furnace is designed to be grounded to the main service or ground bus. If the furnace is not properly grounded, the furnace will not operate. The furnace is designed to be grounded to the main service or ground bus. If the furnace is not properly grounded, the furnace will not operate. The furnace is designed to be grounded to the main service or ground bus. If the furnace is not properly grounded, the furnace will not operate.
3. Replace all of the electrical wires, ensuring that the wires are the same size and type as the original wires. The wires should be labeled "New" for the new wires and "Old" for the old wires. The wires should be labeled "New" for the new wires and "Old" for the old wires. The wires should be labeled "New" for the new wires and "Old" for the old wires.
4. The furnace is designed to be grounded to the main service or ground bus. If the furnace is not properly grounded, the furnace will not operate. The furnace is designed to be grounded to the main service or ground bus. If the furnace is not properly grounded, the furnace will not operate. The furnace is designed to be grounded to the main service or ground bus. If the furnace is not properly grounded, the furnace will not operate.

SPECIFICATIONS & INSTALLATION

1. All of the electrical wiring should be installed in accordance with the National Electrical Code (NEC) and the local electrical code. The wiring should be installed in accordance with the National Electrical Code (NEC) and the local electrical code. The wiring should be installed in accordance with the National Electrical Code (NEC) and the local electrical code.
2. The furnace is designed to be grounded to the main service or ground bus. If the furnace is not properly grounded, the furnace will not operate. The furnace is designed to be grounded to the main service or ground bus. If the furnace is not properly grounded, the furnace will not operate. The furnace is designed to be grounded to the main service or ground bus. If the furnace is not properly grounded, the furnace will not operate.
3. The furnace is designed to be grounded to the main service or ground bus. If the furnace is not properly grounded, the furnace will not operate. The furnace is designed to be grounded to the main service or ground bus. If the furnace is not properly grounded, the furnace will not operate. The furnace is designed to be grounded to the main service or ground bus. If the furnace is not properly grounded, the furnace will not operate.

CAUTION OF EXPLOSION DANGER

Do not attempt to install or operate without proper ventilation. Do not attempt to install or operate without proper ventilation. Do not attempt to install or operate without proper ventilation. Do not attempt to install or operate without proper ventilation. Do not attempt to install or operate without proper ventilation.
