- Metal side rails
- Wood slats

1.2 Assembly Instructions

1. **Unpack Components:** Carefully remove all parts from the packaging. Lay them out on a clean, soft surface to prevent scratches.
2. **Initial Fastening:** During initial assembly, do not fully tighten screws. This allows for minor adjustments to align pre-drilled holes.
3. **Assemble Headboard:** Follow the specific instructions in the included manual for assembling the headboard components, including attaching the wingbacks and ensuring the storage shelf is secure.
4. **Connect Side Rails:** Attach the metal side rails to the headboard and footboard. Ensure proper alignment before tightening.
5. **Install Wood Slats:** Place the wood slats onto the bed frame. The unique bayonet locks and EVA quiet bars are designed to minimize noise.
6. **Assemble Drawers:** Each drawer requires assembly. Insert the poles through the cloth drawers and then bolt them to the frames. The drawers feature velcro strips to connect to the bed frame, preventing sliding.
7. **Final Tightening:** Once all components are in place and aligned, securely tighten all screws to ensure the stability and rigidity of the bed frame.
8. **Drawer Locking:** Each drawer comes with locking screws. Lift and align the drawer with the pre-drilled holes on the bed frame to prevent sliding or wobbling during use.

- **Charging Station:** The built-in charging station includes 2 AC outlets, 1 Type-C port, and 1 USB port. Connect your devices for convenient charging directly from the headboard.
- **RGB LED Lights:** The LED lights can be controlled via a smart app or the included remote control. Adjust color, brightness, scene mode, or set a timer to create your desired ambiance.

2.3 Dustproof Storage Drawers

The bed frame includes four spacious, dustproof fabric-lined drawers on wheels. These drawers provide additional storage space under the bed, helping to keep your bedroom tidy.

- **Usage:** Simply pull the drawers out from under the bed using the integrated handles.
- **Dust Protection:** The fabric lining prevents dust accumulation and small items from falling through.
- **Stability:** Utilize the locking screws to secure the drawers in place when not in use, preventing unwanted movement.

3. Maintenance

3.1 Cleaning

- **Fabric Surfaces:** Wipe clean with a cloth dampened in a mild cleaner. Immediately wipe dry with a clean, dry cloth to prevent moisture damage.
- **Metal and Wood Components:** Use a dry or slightly damp cloth to wipe away dust and debris. Avoid harsh chemicals.
- **Electrical Components:** Ensure the charging station and LED lights are unplugged before cleaning. Use a dry cloth to wipe these areas.

3.2 General Care

- **Regular Checks:** Periodically inspect all screws and fasteners to ensure they remain tight. Retighten as needed to maintain stability and prevent noise.
- **Moving the Bed:** When moving the bed frame, lift it rather than dragging it to prevent damage to the frame and your

flooring. Use appropriate padding and protective materials.

- **Drawer Care:** Keep the drawer wheels free of debris to ensure smooth operation.

4. Troubleshooting

Problem	Possible Cause	Solution
Bed frame is wobbly or noisy.	Loose screws or uneven assembly.	Ensure all screws are fully tightened. Check that the bed frame is on a level surface.
LED lights or charging station not working.	Power connection issue, faulty component.	Check if the power cord is securely plugged into a working outlet. Ensure all internal connections are firm. If issues persist, contact customer support.
Drawers do not slide smoothly or fall out.	Debris in wheels, improper assembly, or locking screws not engaged.	Clean wheels of any debris. Recheck drawer assembly. Ensure locking screws are properly engaged in the pre-drilled holes on the bed frame.
Mattress slides on the frame.	Mattress not compatible with embedded design, or anti-slip features not effective.	Ensure your mattress is within the recommended 8-16 inch thickness. The embedded design is intended to prevent sliding. Consider using a non-slip mat between the mattress and slats if sliding persists.
