SETUP

Initial Charging of the P3 Pro

Before first use, it is recommended to fully charge your InfinaCore P3 Pro. You can charge it by plugging the built-in Type A plug directly into a wall outlet. Alternatively, you can use a USB-C cable to charge the power bank via one of its USB-C ports.

Charging Devices

The P3 Pro offers multiple ways to charge your devices:

- **Wired Charging:** Connect your devices using compatible USB-C or USB-A cables to the respective ports on the charger.
- **Wireless Charging:** Place your Qi2-compatible device (e.g., iPhone 15/16 with MagSafe) directly onto the circular wireless charging pad on the top surface of the P3 Pro. Ensure proper alignment for optimal charging speed. Note that some phone cases may interfere with wireless charging.
- **Wall Charging Mode:** When plugged into a wall outlet, the P3 Pro functions as a direct wall charger, simultaneously charging itself and connected devices.

Charge More. Worry Less.

The image shows a black InfinaCore P3 Pro charging station plugged into a white wall outlet. Three cables are connected to it: a white cable for AirPods, a black cable for an iPhone, and an orange cable for an iPad. On a wooden desk in front of the station, an iPhone 16 Pro Max is lying flat, displaying a green wireless charging symbol on its screen. To the right, a portion of a laptop with a colorful screen is visible.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the exterior of the P3 Pro. Avoid using harsh chemicals or abrasive materials.
- **Storage:** Store the device in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Handle the device with care. While durable, avoid dropping it or subjecting it to strong impacts. Ensure the foldable plug is fully retracted when not in use to prevent damage.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Device not charging	Low battery on P3 Pro; cable issue; device incompatibility.	Recharge P3 Pro fully. Try a different cable. Ensure your device is compatible with the charging method (wired/wireless).
Slow charging speed	Using a non-fast charging port/cable; multiple devices charging simultaneously; phone case interference (wireless).	Use the designated fast-charging ports (USB-C). Disconnect other devices if faster charging is needed for one. Remove phone case for wireless charging if experiencing issues.
LCD display not working	Device is off; temporary software glitch.	Press the power button to activate the display. If persistent, try fully discharging and recharging the unit.
Unit feels warm during use	Normal operation during high power output; poor ventilation.	This is normal for high-power devices. Ensure adequate ventilation around the unit. If it becomes excessively hot, disconnect and allow to cool before resuming use.
Foldable plug feels flimsy	Normal design for portability.	Handle with care when extending or retracting the plug. It is designed to be compact and foldable.
