- Do not use power tools for assembly unless specifically instructed, as overtightening may damage components.
- Place the bed on a level surface.
- Do not stand or jump on the bed frame.
- Use only the recommended mattress size for this bed frame.

Step 2: Install Center Support Bar and Legs

Attach the center support bar (E) to the pre-drilled holes on the headboard and footboard. Secure the support legs (F) to the center bar. Ensure the center bar is level and provides adequate support.

Step 3: Place Wooden Slats

Lay the wooden slats (D) across the side rails, ensuring they are evenly spaced and secured if attachment points are present. The mattress anti-displacement device should be positioned at the foot of the bed to prevent the mattress from sliding.
