Legami SSBM0002

Legami Insulated Water Bottle User Manual

Model: SSBM0002

INTRODUCTION

Thank you for choosing the Legami Insulated Water Bottle. This manual provides essential information for the proper use, care, and maintenance of your new thermal bottle. Designed for convenience and durability, this bottle is engineered to keep your beverages at their desired temperature for extended periods.

Image: The Legami Insulated Water Bottle in blue, featuring a starry night design with constellations and the phrase "Stars belong to dreamers." The bottle has a dark blue cap and a matching silicone carrying loop.

SETUP AND FIRST USE

Before using your Legami Insulated Water Bottle for the first time, please follow these steps:

1. **Unpack:** Carefully remove the bottle from its packaging.
2. **Initial Cleaning:** Wash the bottle and cap thoroughly with warm, soapy water. Rinse well to remove any soap residue. Allow all parts to air dry completely before reassembling.
3. **Pre-heating/Pre-cooling (Optional):** For optimal temperature retention, you can pre-heat the bottle with hot water for 5-10 minutes before adding hot beverages, or pre-cool it with cold water for 5-10 minutes before adding cold beverages.
4. **Filling:** Fill the bottle with your desired beverage, ensuring not to overfill. Leave a small space below the rim to allow for the cap.
5. **Secure the Cap:** Screw the cap on tightly to ensure an airtight and leak-proof seal.

OPERATING INSTRUCTIONS

The Legami Insulated Water Bottle is designed for daily use, keeping your drinks hot or cold for extended periods.

- **Temperature Retention:** This double-layer 18/8 stainless steel bottle is engineered to keep hot drinks warm for up to 12 hours and cold drinks chilled for up to 24 hours.
- **Airtight Seal:** The cap provides an airtight seal, preventing leaks and maintaining beverage temperature. Always ensure the cap is securely tightened before transport.
- **Carrying Handle:** The integrated silicone handle on the cap allows for easy carrying and attachment to bags or backpacks.
- **Recommended Beverages:** Suitable for water, tea, coffee, and other non-carbonated beverages.

CARE AND MAINTENANCE

Proper care will extend the life and performance of your insulated bottle.

- **Cleaning:** Hand wash only. Use warm water and mild dish soap. For thorough cleaning, a bottle brush may be helpful. Rinse thoroughly.
- **Drying:** Allow the bottle and cap to air dry completely after washing, preferably upside down, to prevent odor and mildew.
- **Do NOT use:**
 - Dishwasher: Dishwashing can damage the vacuum insulation and exterior finish.
 - Microwave: The stainless steel construction is not microwave safe and can cause damage to the appliance and bottle.
 - Bleach or chlorine-based cleaners: These can damage the stainless steel.
 - Abrasive cleaners or scrubbers: These can scratch the exterior finish.
- **Storage:** Store the bottle with the cap off or slightly ajar to allow air circulation when not in use for extended periods.

TROUBLESHOOTING

If you encounter any issues with your Legami Insulated Water Bottle, please refer to the following common solutions:

Bottle is leaking:

- Ensure the cap is screwed on tightly and straight.
- Check the silicone seal (gasket) inside the cap for proper placement and any damage. If it's dislodged or damaged, it may cause leaks.
- Avoid overfilling the bottle.

Beverage not staying hot/cold:

- Ensure the cap is securely tightened to maintain the vacuum seal.
- Consider pre-heating or pre-cooling the bottle before filling with your beverage.
- Avoid frequently opening the bottle, as this allows temperature to escape.
- Ensure the bottle has not been damaged (e.g., dented), which could compromise the vacuum insulation.

Unpleasant odor inside the bottle:

- Wash the bottle thoroughly with warm, soapy water and a bottle brush.
- For stubborn odors, a mixture of baking soda and water can be used. Let it sit for a few hours or overnight, then rinse thoroughly.
- Always allow the bottle to air dry completely with the cap off after washing.

SPECIFICATIONS

Model Name	Vacuum Bottle
Model Number	SSBM0002
Brand	Legami
Capacity	300 ml (10.1 Ounces)
Material	Double-layer 18/8 Stainless Steel, Silicone (handle), Plastic (cap)
