GRIFEMA GA1006

GRIFEMA GA1006 TSA Approved Combination Luggage Lock User Manual

Model: GA1006

Introduction

The GRIFEMA GA1006 TSA Approved 3-Digit Combination Luggage Lock is designed to provide security for your belongings while simplifying travel. This padlock combines robust security features with user-friendly operation, ensuring peace of mind for various applications, including luggage, gym bags, and backpacks.
This manual provides detailed instructions for setting up, operating, and maintaining your GRIFEMA GA1006 lock. Please read it carefully before use.

Product Features

- **TSA Approved Design:** Allows airport security personnel to inspect luggage without damaging the lock, using a master key. Your personal combination remains secure.
- **Durable Construction:** Features a reinforced zinc alloy body and a flexible 3mm steel cable, designed to resist cutting and prying.
- **3-Digit Combination:** Offers a keyless security solution with a customizable 3-digit code.
- **Easy Code Setup:** Personalize your combination quickly and easily.
- **One-Handed Operation:** Ergonomic design for smooth unlocking.
- **Weatherproof Performance:** Internal mechanism is sealed to resist dust, moisture, and temperature variations.
- **Versatile Use:** Suitable for suitcases, backpacks, gym lockers, toolboxes, and more.

Setup: Setting Your Personal Combination

Your lock is preset to 0-0-0 from the factory. Follow these steps to set your unique 3-digit combination:

1. **Open the Lock:** Ensure the lock is set to the default combination (0-0-0) and the cable is released.
2. **Locate Reset Button:** Identify the small reset button at the bottom of the lock.
3. **Press Reset Button:** Use a pointed object (like a pen or a small tool) to firmly press and hold the reset button.
4. **Set New Combination:** While holding the reset button, rotate the dials to your desired 3-digit combination. Choose a memorable number.
5. **Release Reset Button:** Release the reset button. Your new combination is now set.
6. **Test New Combination:** Scramble the dials, then enter your new combination and press the unlock button to ensure it opens correctly.

Image 2: Visual guide demonstrating the four steps to set your exclusive password for the GRIFEMA GA1006 lock.

Important: Remember your combination. There is no master key for users to reset the combination if forgotten without the original code. If you forget your code, you may need to try all 1000 combinations (000-999) or contact support.

Operating Instructions

Locking Your Belongings

1. Enter your personal 3-digit combination on the dials.
2. Press the unlock button to release the cable.
3. Thread the steel cable through the zippers or latch of your item.
4. Insert the end of the cable back into the lock body until it clicks securely.
5. Scramble the dials to secure the lock.

Unlocking Your Belongings

1. Rotate the dials to your personal 3-digit combination.
2. Press the unlock button. The cable will release, allowing you to open your item.

TSA Inspection Feature

The GRIFEMA GA1006 lock is TSA (Transportation Security Administration) approved. This means authorized security personnel can open your lock using a universal master key without cutting or damaging it. After inspection, they will re-lock your item, and your personal combination will remain unchanged.

Versatile Applications

This lock is suitable for a variety of uses beyond luggage:

- Travel: Checked baggage, backpacks, camera cases.
- Daily Use: Gym lockers, school backpacks, toolboxes, bike helmets.

- Storage: Small storage units, cabinets.

Maintenance

- **Cleaning:** Wipe the lock body with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Lubrication:** If the dials become stiff, apply a small amount of silicone-based lubricant to the moving parts. Do not use oil-based lubricants as they can attract dust.
- **Storage:** Store the lock in a dry place when not in use.
- **Inspection:** Periodically check the steel cable for any signs of wear or damage. If the cable is compromised, replace the lock.

Troubleshooting

Problem	Possible Cause	Solution
Lock does not open with correct combination.	Incorrect combination entered, or dials are not perfectly aligned.	Ensure each number is precisely centered in the window. Double-check your combination.
Cannot set a new combination.	Reset button not fully pressed, or original combination not set correctly.	Ensure the lock is open with the current combination. Press the reset button firmly until it clicks and hold it while setting the new code.
Dials are stiff or difficult to turn.	Accumulation of dust or debris, or lack of lubrication.	Clean the dials with a soft cloth. Apply a small amount of silicone-based lubricant if necessary.
Cable does not insert or release smoothly.	Obstruction in the cable slot, or mechanism misalignment.	Check for any foreign objects in the cable slot. Ensure the lock is fully open when attempting to insert or release the cable.
