2. IMPORTANT SAFETY INSTRUCTIONS

To reduce the risk of fire, electric shock, or injury, always follow these basic safety precautions:

- Read all instructions before operating the appliance.
- Do not immerse the motor base in water or other liquids.
- Ensure the voltage indicated on the appliance corresponds to your local mains voltage before connecting.
- Unplug from the outlet when not in use, before assembling or disassembling parts, and before cleaning.
- Avoid contact with moving parts.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been dropped or damaged in any manner.
- The use of attachments not recommended or sold by the manufacturer may cause fire, electric shock, or injury.

- Do not use outdoors.
- Do not let the cord hang over the edge of a table or counter, or touch hot surfaces.
- Always ensure the lid is securely locked in place before operating.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory, or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

3. PRODUCT COMPONENTS

Familiarize yourself with the parts of your FOHERE Electric Citrus Juicer for proper assembly and operation.

New Upgraded Juicer Head

Juice yield $\{>\}$ 92%

Our juicers can often squeeze more juice from fruits

8-rib spiral orange juice head

No need for fast stirring, not easy to oxidize, slow pressing without adding water, high juice yield and more nutrients

Traditional juicer head

High-speed blades oxidize at high temperature, poor taste, low juice yield, and nutrient loss

Image 3.1: Exploded view of the FOHERE Electric Citrus Juicer components, highlighting the 8-rib spiral orange juice head design.

The juicer consists of the following main parts:

- **Motor Base:** Contains the electrical components and power button.
- **Juice Collection Cup:** Transparent container for collecting squeezed juice.
- **Filter/Strainer:** Separates pulp and seeds from the juice.

- **Juicing Cone:** The part that presses against the fruit to extract juice. This model features an 8-rib spiral design for efficient extraction.
- **Lid:** Covers the juicing cone and fruit during operation.
- **Juice Spout:** Allows for controlled pouring of juice.

4. SETUP AND FIRST USE

Before using your juicer for the first time, ensure all removable parts are cleaned according to the 'Maintenance' section. Assemble the juicer as follows:

1. Place the motor base on a stable, flat surface.
2. Insert the juice collection cup onto the motor base.
3. Place the filter,strainer into the juice collection cup.
4. Position the juicing cone onto the filter.
5. Place the lid on top of the assembled components.
6. Plug the power cord into a suitable electrical outlet. The blue light on the switch button will flash once.
7. For first use, press and hold the on/off button for 1 second to activate the machine. The blue light will illuminate, indicating standby mode.

How to use FOHERE orange juice machine?

Image 4.1: Step-by-step visual instructions for setting up and operating the juicer.

5. OPERATING INSTRUCTIONS

Follow these steps to extract juice from citrus fruits:

1. Ensure the juicer is assembled and in standby mode (blue light on).
2. Cut your citrus fruit (oranges, lemons, limes, grapefruits) in half. For very large fruits, you may cut them into quarters for better fit and extraction. Removing the pedicle (stem end) can also improve juice yield.
3. Open the lid and place one half of the cut citrus fruit onto the juicing cone, cut-side down.
4. Close the lid and turn it clockwise to securely lock it in place.
5. Press the on/off button once to start the juicing process. The juicer will automatically press and rotate to extract juice.
6. Once juicing is complete, the machine will stop automatically.

7. Place a glass or cup under the juice spout. Open the spout to allow the freshly squeezed juice to flow into your container.
8. Repeat the process for additional fruit halves.

Suitable for a variety of citrus fruits

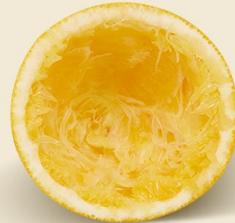

Full squeeze and high juice yield

Lemon

Limes

Fresh orange

Image 5.1: The juicer is suitable for a variety of citrus fruits, demonstrating efficient juice extraction.

Image 5.2: Dispensing fresh orange juice from the juicer's spout.

6. CLEANING AND MAINTENANCE

Regular cleaning ensures optimal performance and longevity of your juicer. Always unplug the appliance before cleaning.

Removable And Easy To Clean

Can be rinsed with water, such as the juicer head, cup body parts, etc.; it is recommended to wipe the body with a damp cloth

Warning: Do not immerse the motor parts in water or rinse with water!

Image 6.1: Cleaning the removable juicer head and cup under running water. Note the warning against washing the motor base.

- Disassembly:** Unlock and remove the lid, juicing cone, filter, and juice collection cup from the motor base.
- Cleaning Removable Parts:** Rinse the lid, juicing cone, filter, and juice collection cup under running water immediately after use to prevent pulp from drying and sticking. Use a soft brush if necessary to remove any residue. These parts are **not** dishwasher safe and should be hand washed.
- Cleaning Motor Base:** Wipe the exterior of the motor base with a damp cloth. **Never immerse the motor**

base in water or any other liquid, and do not rinse it under running water.

4. **Drying:** Ensure all parts are thoroughly dry before reassembling or storing the juicer.
5. **Storage:** Store the assembled juicer in a clean, dry place. Its compact design allows for easy storage.

7. TROUBLESHOOTING

If you encounter issues with your FOHERE Electric Citrus Juicer, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Juicer does not turn on.	Not plugged in; power switch off; lid not locked.	Ensure the power cord is securely plugged in. Press and hold the on/off button for 1 second to enter standby mode. Ensure the lid is turned clockwise and securely locked.
Low juice yield or incomplete squeezing.	Fruit too large; fruit not centered; excessive pulp buildup.	Cut larger fruits into quarters. Ensure fruit is centered on the juicing cone. Clean the juicing unit promptly after each use to prevent pulp accumulation.
Lid does not stay locked or lifts during operation.	Lid not properly secured; fruit too large or misaligned.	Ensure the lid is firmly turned clockwise until it clicks into the locked position. Verify the fruit is not excessively large and is centered on the juicing cone.
Juice spout leaks.	Spout not fully closed; seal dirty or damaged.	Ensure the juice spout is pushed up to the closed position. Clean the spout area to remove any pulp or residue. If leakage persists, contact customer support.

8. SPECIFICATIONS

Technical details for the FOHERE Electric Citrus Juicer Squeezer JC-3005:

- **Brand:** FOHERE
- **Model Name:** JC-3005
- **Color:** Silver
- **Product Dimensions:** 6.7"D x 11.34"W x 5.12"H
- **Item Weight:** 2.79 pounds
- **Maximum Power:** 30 Watts
- **Voltage:** 120 Volts
- **Finish Type:** Non Stick (referring to internal components)
- **Product Care Instructions:** Hand Wash Only (for removable parts)
- **Is Dishwasher Safe:** No

Small Size, Easy to Store
