4. OPERATING INSTRUCTIONS

4.1 Power On/Off

Press the power button on the projector or remote control to turn the unit on or off.

4.2 Image Adjustment

The TOPTRO Legend Pro Max features AI-powered automatic adjustments for a clear picture:

- **Auto Focus:** The projector automatically adjusts the image clarity.
- **Auto Keystone Correction:** Corrects trapezoidal distortion to achieve a rectangular image.
- **Auto Obstacle Avoidance:** Detects and adjusts the projection area to avoid objects on the wall.
- **Auto Screen Fit:** Automatically scales the image to fit the projection surface.
- **Digital Zoom:** Adjust the image size from 100% down to 50% without moving the projector.

5. MAINTENANCE

5.1 Dust Filter Cleaning

The projector features a fully sealed optical engine to minimize dust intrusion. However, it is recommended to clean the dust filter every 15 days to ensure proper ventilation and prevent overheating, which can damage the LCD panel.

Important: Damage to the LCD panel due to high temperatures from poor ventilation or dust-related issues is not covered under warranty.

6. TROUBLESHOOTING

6.1 No Picture, Only Sound (Copyrighted Content)

Due to HDCP (High-bandwidth Digital Content Protection) and copyright restrictions, content from streaming services like Netflix and Amazon Prime Video cannot be wirelessly mirrored directly to the projector. If you experience no picture but only sound when playing such content, use a Fire Stick, computer, or laptop connected via HDMI.

6.2 No Sound (Dolby Sound)

If there is no sound when playing copyrighted videos, please turn off Dolby Sound in the projector's audio settings.

6.3 Image Not Rectangular (Keystone Correction)

While the projector has auto keystone correction, if the image remains slightly trapezoidal, ensure the projector is placed flat and directly facing the screen. Manual 4P+4D digital keystone correction is also available for fine-tuning.

7. SPECIFICATIONS

Feature	Detail
