- **Weight Limits:** Do not exceed the maximum static load of 22 lb (10 kg) per shelf. Each hook has a maximum static load of 11 lb (5 kg). Overloading can compromise stability and cause damage.
- **Assembly:** Ensure all components are correctly assembled and tightened according to the instructions. Do not use power tools at high torque settings, as this may damage the particleboard.
- **Placement:** Place the shoe rack on a flat, stable surface. Avoid placing it in areas with high humidity or direct sunlight to prevent material degradation.
- **Children:** Keep small parts and packaging materials away from children during assembly.
