## 4.2 Programmable Features

Key customization, including macros and RGB lighting effects, can be programmed using the MonsGeek Driver software when the keyboard is connected in wired mode. The keyboard also supports N-Key Rollover for accurate input during fast typing or gaming.

## 4.3 Volume Knob

The integrated knob allows for easy adjustment of system volume, including mute/unmute functionality.

## 4.4 RGB Lighting

The keyboard features vibrant RGB backlighting with multiple preset effects. Users can customize lighting patterns and colors through the MonsGeek Driver software for a personalized experience.
