

SMART LB FDQF02

SMART LB Apple Find My Enabled Air Tracker Tag FDQF02 User Manual

Model: FDQF02

INTRODUCTION

This manual provides detailed instructions for the setup, operation, and maintenance of your SMART LB Apple Find My Enabled Air Tracker Tag, model FDQF02. This device is designed to help you locate your personal items using the Apple Find My network, offering a reliable solution for tracking keys, bags, wallets, and more.

The tracker integrates seamlessly with the Apple Find My app on your iOS devices (iPhone, iPad, Mac, Apple Watch), providing both nearby and long-distance tracking capabilities without requiring additional applications or subscription fees.

1. SETUP

1.1 Initial Activation and Battery

Your SMART LB Air Tracker Tag comes with a CR2032 lithium metal battery pre-installed. To activate the device for pairing, ensure the battery is properly seated. The battery has an estimated lifespan of up to 2 years.

1.2 Pairing with Apple Find My App

Follow these steps to connect your tracker tag to your Apple Find My network:

1. Step 1: Power On

Press the power button on the device once. The device will enter pairing mode, indicated by a specific sound or light signal (refer to device for specific indicator).

2. Step 2: Enable Bluetooth and Open Find My App

On your iOS device (iPhone, iPad, etc.), ensure Bluetooth is enabled. Then, open the Apple Find My app.

3. Step 3: Add New Item

Navigate to the "Items" tab within the Find My app. Tap on the "+" icon, then select "Add Other Item" or "Other Supported Item".

4. Step 4: Connect and Name

The app will search for nearby compatible items. Once your SMART LB tracker is detected (e.g., "ZTAG_03"), tap "Connect". You will then be prompted to name your item and assign an emoji, which helps in easy identification within the app.

After successful pairing, your tracker's location will appear on the map in the Find My app.

2. OPERATING INSTRUCTIONS

2.1 Finding Items Nearby (Play Sound)

When your tracker is within Bluetooth range of your iOS device, you can make it emit a sound to help you locate it. Open the Find My app, select your tracker from the "Items" tab, and tap "Play Sound". The tracker will emit an audible alert, guiding you to its location.

NEVER FORGET YOUR WALLET ITEM

Never forget your wallet again with automatic reminders when you leave items behind.

2.2 Finding Items Far Away (Map Tracking)

If your item is out of Bluetooth range, the Apple Find My network can help locate it. This network uses millions of Apple devices worldwide to detect your tracker's Bluetooth signal and relay its location to you privately and securely. Open the Find My app, select your tracker, and view its last known location on the map. You can then get directions to that location.

2.3 Left Behind Alarm / Notify When Left Behind

To prevent leaving your items behind, you can enable "Notify When Left Behind" in the Find My app. If your tracker separates from your iOS device, you will receive an immediate notification on your device, indicating its last detected location.

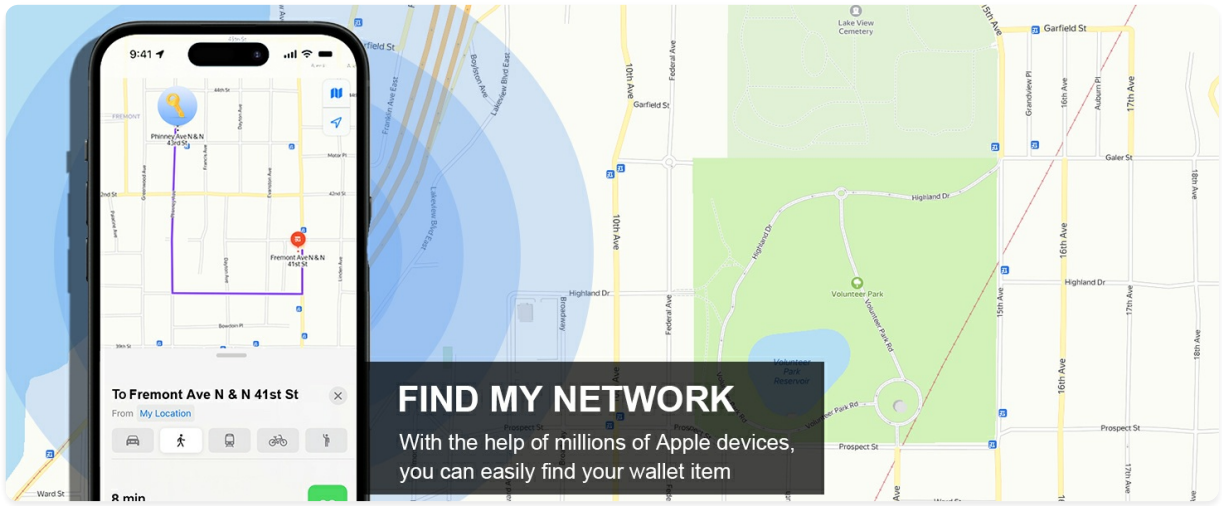

Image: A phone screen showing a "Left Behind" notification for the tracker.

2.4 Lost Mode

If an item with your tracker is lost, you can activate "Lost Mode" in the Find My app. This will lock your tracker, display a custom message and contact information to anyone who finds it, and notify you when its location is detected by the Find My network.

2.5 Sharing Location

You can share the location of your tracker with family and friends through the Find My app. This allows multiple trusted individuals to track the item, which is useful for shared belongings or family pets.

3. MAINTENANCE

3.1 Battery Replacement

The SMART LB Air Tracker Tag uses a standard CR2032 coin cell battery. When the battery level is low, you will receive a notification in the Find My app. To replace the battery:

1. Locate the battery compartment on the tracker.
2. Use a small screwdriver (often included with the product) to open the compartment cover.
3. Remove the old CR2032 battery.
4. Insert a new CR2032 battery with the positive (+) side facing up.
5. Securely close the battery compartment cover.

Dispose of used batteries responsibly according to local regulations.

3.2 Cleaning

To clean your tracker, gently wipe it with a soft, dry, lint-free cloth. Avoid using abrasive materials, solvents, or harsh chemicals, as these can damage the device. Do not submerge the device in water.

4. TROUBLESHOOTING

• Tracker Not Connecting/Pairing:

- Ensure your iOS device's Bluetooth is enabled.
- Make sure the tracker is powered on and in pairing mode (press the button once).
- Check if the tracker's battery is charged or needs replacement.
- Move closer to the tracker during the pairing process.
- Restart your iOS device and try again.

• Tracker Not Emitting Sound:

- Ensure the tracker is within Bluetooth range of your iOS device.
- Check the battery level in the Find My app; a low battery might affect sound output.
- Verify that the "Play Sound" command was successfully sent from the Find My app.

• Inaccurate Location:

- Location accuracy depends on the density of the Apple Find My network. In areas with fewer Apple devices, location updates might be less frequent or precise.
- Ensure your iOS device has a stable internet connection (Wi-Fi or cellular data) to receive location updates.

• Battery Drains Quickly:

- Frequent "Play Sound" commands or constant searching in dense areas can consume more battery.
- Ensure you are using a fresh, high-quality CR2032 battery.

For further assistance, refer to the Apple Find My app's help section or contact SMART LB customer support.

5. SPECIFICATIONS

Model Number	FDQF02
Dimensions (L x W x H)	1.3 x 0.2 x 1.3 inches (33 x 5 x 33 mm)
Item Weight	0.635 ounces (18 grams)
