SMART LB FDQF02

SMART LB Apple Find My Enabled Air Tracker Tag

Model: FDQF02

INTRODUCTION

This manual provides instructions for the setup, operation, and maintenance of your SMART LB Apple Find My Enabled Air Tracker Tag, Model FDQF02. This device is designed to help you locate your personal items using Apple's Find My network.

Key Features:

- Utilizes Apple's Find My network for item location (iOS only).
- Allows remote ringing of the tag when within Bluetooth range.
- Provides location tracking on a map for items further away.
- Lost Mode notification when detected by the Find My network.
- Privacy features ensure anonymous and encrypted communication.
- Replaceable CR2032 battery with up to 2 years of life.

PACKAGE CONTENTS

Please verify that all items are present in your package:

- SMART LB Air Tracker Tag (FDQF02)
- CR2032 Battery (pre-installed or included separately)
- Mini Screwdriver
- Spare Screws (4 pieces)
- Corded Loops (2 pieces)
- Keychain
- User Manual

SETUP

1. Powering On the Device

Press the power button located in the center of the device once. You will hear a beep sound, indicating the device has entered pairing mode.

Figure 1: Pressing the power button to activate the tracker tag.

2. Pairing with Your iOS Device

1. Ensure your iOS device (iPhone, iPad, or Mac) has Bluetooth enabled and the 'Find My' app is installed and updated.
2. Open the 'Find My' app on your iOS device.
3. Navigate to the 'Items' tab.
4. Tap the '+' icon and select 'Add Other Item' or 'Other Supported Item'.
5. Your device will detect the SMART LB Air Tracker Tag. Follow the on-screen prompts to connect and name your tracker.

WORKS WITH APPLE FIND MY NETWORK

Easily locate your items using the Find My app on your iPhone, iPad, Mac, or Apple Watch

OPERATING INSTRUCTIONS

1. Finding Items Nearby (Play Sound)

When your tracker tag is within Bluetooth range of your iOS device, you can make it emit a sound to help you locate it. Open the 'Find My' app, select your tracker from the 'Items' list, and tap 'Play Sound'.

FIND NEARBY

Tap “play sound” to find item right now.
Incompatible with android devices

Figure 3: Using the 'Play Sound' feature to find items within Bluetooth range.

2. Finding Items Far Away (Map Tracking)

If your tracker tag is out of Bluetooth range, you can still locate it using the Apple Find My network. The 'Find My' app will display the last known location of your item on a map, and you can get directions to that location. The network anonymously relays location data from other Apple devices.

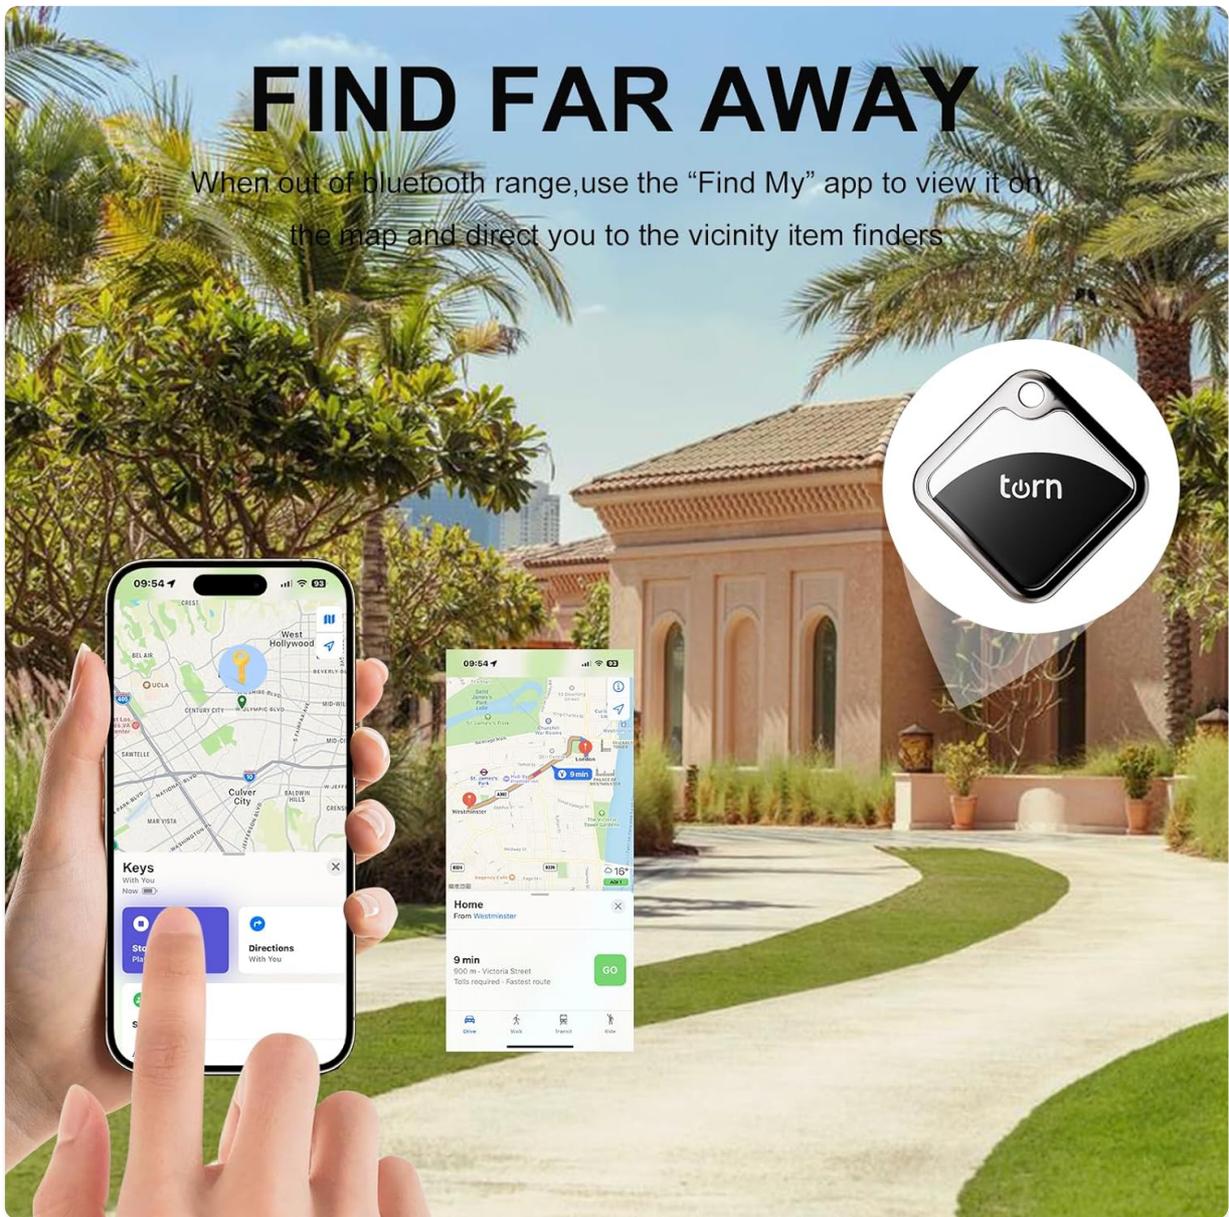

Figure 4: Tracking your item's location on a map when out of Bluetooth range.

3. Lost Mode

If an item with your tracker tag is lost, you can enable 'Lost Mode' in the 'Find My' app. When another Apple device in the Find My network detects your lost item, you will receive a notification of its location. You can also leave a contact message for anyone who finds your item.

Advanced Privacy and Security Features

1.Unwanted Tracking
Ensures privacy and security by alerting you if an unknown smart wallet moves with you, emitting sounds if separated from its owner, and using the Find My Network to identify unauthorized card.
Stay protected and find your belongings with confidence.

2.Privacy Protection
Ensure your location data stays private with encrypted, anonymous tracking features in Find My app.

Figure 5: Activating Lost Mode for secure item tracking.

4. Left Behind Alarm

The tracker tag can notify you if you leave an item behind. When the item finder moves out of Bluetooth range from your iPhone, you will receive a notification on your device, indicating the item's last detected location.

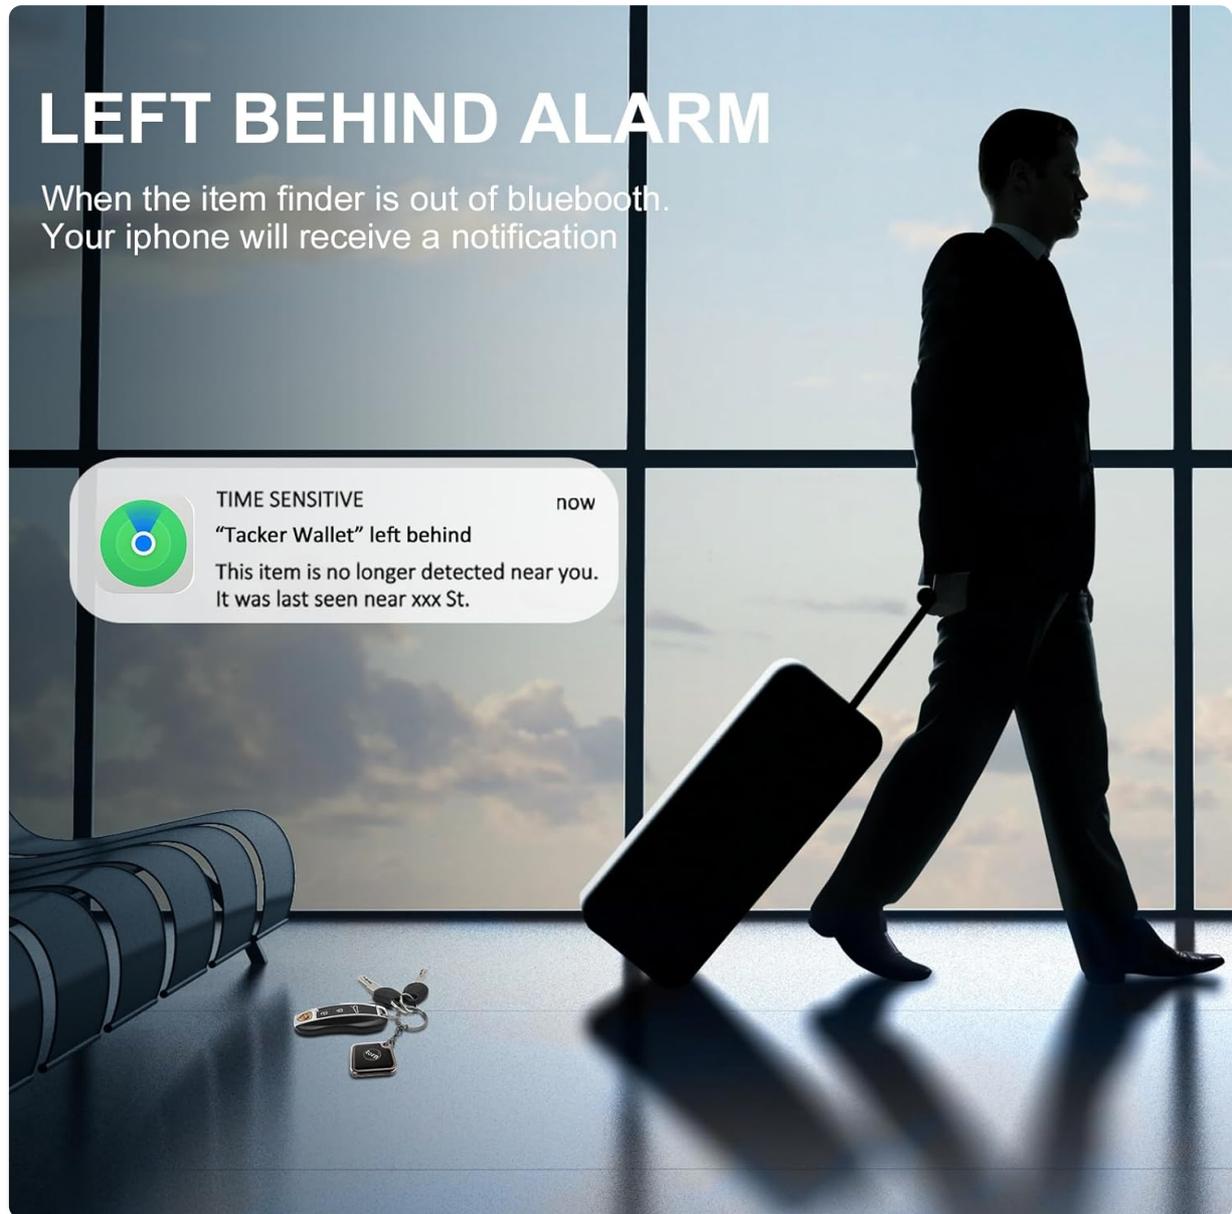

Figure 6: Receiving a 'Left Behind' notification when your item is out of range.

5. Privacy Features

All communication within the Find My network is anonymous and encrypted to protect your privacy. Location data and history are never stored on the item finder itself. The system also includes features to prevent unwanted tracking by alerting you if an unknown tracker moves with you.

Ideal for Various Occasions

Figure 7: Overview of privacy and security features.

6. Sharing Location

You can share the location of your tracker tag with family and friends through the 'Find My' app, allowing multiple users to track the same item.

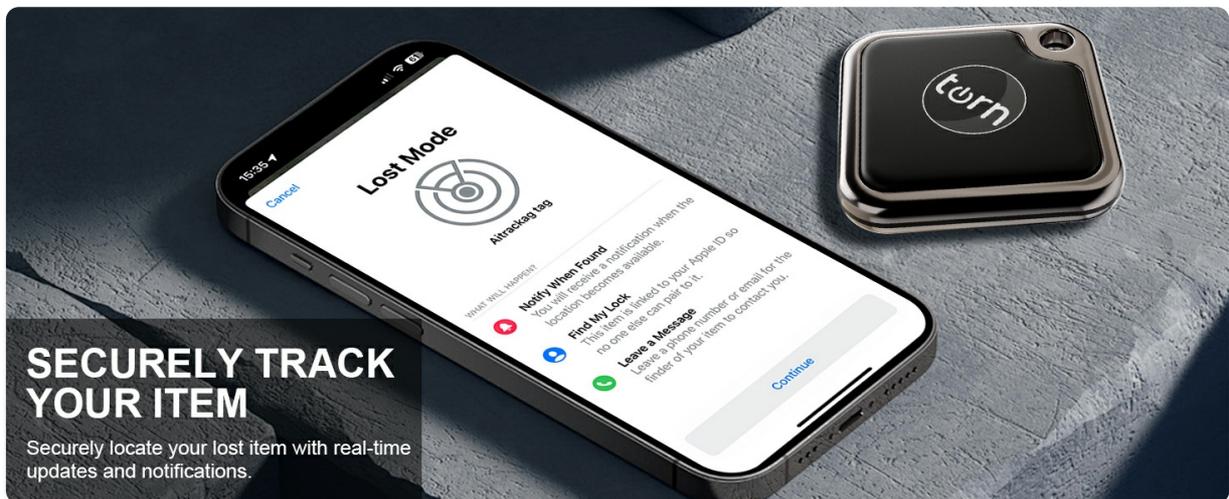

Figure 8: Sharing your tracker's location with others.

BATTERY MAINTENANCE

The SMART LB Air Tracker Tag uses a replaceable CR2032 lithium metal battery, which is included. The battery can last up to 2 years depending on usage.

1. Checking Battery Status

You can check the current battery level of your tracker tag within the 'Find My' app on your iOS device.

2. Replacing the Battery

When the battery is low, replace it with a new CR2032 battery. Use the provided mini screwdriver to open the device casing, carefully remove the old battery, insert the new one with the positive (+) side facing up, and secure the casing with the screws. Spare screws are included in the package.

TROUBLESHOOTING

- **Device not pairing:** Ensure the device is powered on and in pairing mode (indicated by a beep).

Verify Bluetooth is enabled on your iOS device and the 'Find My' app is open. Try restarting both the tracker and your iOS device.

- **No sound when 'Play Sound' is activated:** Check if the tracker is within Bluetooth range. Ensure the battery is not depleted.
- **Inaccurate location:** Location accuracy depends on the density of the Apple Find My network. Ensure your tracker is in an area where it can be detected by other Apple devices.
- **'Left Behind' notifications not working:** Check the settings in the 'Find My' app to ensure 'Notify When Left Behind' is enabled for your tracker. Verify Bluetooth connection is stable.
