4. OPERATING INSTRUCTIONS

Familiarize yourself with the bike's controls before riding.

Riding the Bike:

- **Starting:** Ensure the seat is at an appropriate height allowing the rider to comfortably touch the ground with their toes.
- **Shifting Gears:** The 7-speed derailleur system is operated via a twist grip shifter on the handlebar. Twist the grip to change gears, adjusting to terrain and desired speed.
- **Braking:** Use both hand levers to engage the dual-disc brakes. Apply even pressure to both levers for controlled stopping.
- **Steering:** Maintain a firm but relaxed grip on the anti-slip handlebars.

5. MAINTENANCE

Regular maintenance ensures the longevity and safe operation of your DEYGIA Kids Cruiser Bike.

- **Tire Pressure:** Check tire pressure regularly and inflate to the recommended PSI found on the tire sidewall.
- **Chain Lubrication:** Keep the chain clean and lubricated to ensure smooth shifting and prevent rust.
- **Brake Inspection:** Periodically check brake pads for wear and ensure brake levers are responsive. Adjust as needed.
- **Fasteners:** Ensure all bolts and nuts are tightened securely.
- **Cleaning:** Clean the bike with mild soap and water. Avoid high-pressure washing directly on bearings or electrical components.
- **Fenders:** The fenders help protect against dirt, mud, and splashes, extending the life of the bike's components. Keep them clean and free from debris.

6. TROUBLESHOOTING

This section addresses common issues you might encounter.

Problem	Possible Cause	Solution
Chain frequently comes off	Derailleur misalignment, worn chain, or improper chain tension.	Inspect the derailleur for proper alignment. Check chain for wear and tension. Adjust as necessary. Consult a bike mechanic if unsure.
Brakes feel spongy or unresponsive	Brake cable slack, worn brake pads, or contaminated rotors.	Adjust brake cable tension. Replace worn brake pads. Clean rotors with a suitable brake cleaner.
Difficulty shifting gears	Derailleur cable tension, dirty derailleur, or bent hanger.	Adjust the derailleur cable tension. Clean the derailleur. If the hanger is bent, professional repair may be required.
Seat slips down during ride	Quick-release lever not tight enough or seat post clamp loose.	Ensure the quick-release lever is fully tightened. If the issue persists, check the seat post clamp bolt for tightness.
