1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, soft surface to prevent scratches.
2. **Assemble Frame Sides:** Connect the side rails to the headboard and footboard using the provided hardware. Do not fully tighten bolts until the frame is complete.
3. **Install Steel Slats:** The steel slats feature a buckle design for easy, bolt-free installation. Align each slat with the designated slots on the side rails and press down until it clicks into place.
4. **Install Charging Station:** Insert the charging station unit into the designated slot on the headboard shelf. Ensure it is flush and secure.
5. **Assemble Storage Drawer:** Attach the wheels to the storage drawer frame. The drawer is designed to slide under the bed.

6. MAINTENANCE

- **Cleaning:** Wipe the metal frame with a damp cloth. For the upholstered headboard, use a fabric cleaner suitable for linen, following the product instructions.
- **Hardware Check:** Periodically inspect all bolts and connections to ensure they remain tight. Tighten as necessary to maintain stability and prevent noise.
- **Drawer Maintenance:** Keep the drawer wheels free of debris to ensure smooth operation.
- **Charging Station:** Keep the charging ports clean and free of dust. Do not use liquid cleaners directly on the electrical components.

7. TROUBLESHOOTING

- **Bed Frame is Noisy:** Ensure all bolts are securely tightened. Loose connections can cause squeaking. Check that the steel slats are properly seated in their buckle mechanisms.
- **Mattress Slides:** The bed frame features an embedded design to minimize mattress sliding. Ensure your

mattress fits within the frame's dimensions. If sliding persists, consider using a non-slip mattress pad.

- **Drawer Does Not Slide Smoothly:** Check the wheels for any obstructions or debris. Ensure the drawer is properly aligned with the under-bed space. The Velcro attachment should be used to secure the drawer when closed, not to force its movement.
- **Charging Station Not Working:** Verify that the power cord is securely plugged into a functional wall outlet. Check if the devices being charged are compatible and their cables are working correctly.
