7. MAINTENANCE

7.1 Cleaning the Blades

1. Turn off and unplug the device.

After every few uses, or if the blades feel sluggish, apply a small drop of the provided lubricating oil to the blades. Turn on the device for a few seconds to distribute the oil evenly. This helps maintain blade sharpness and prolongs the life of the device.

7.3 Storage

Store the kit and its accessories in a dry, cool place, away from direct sunlight and moisture. Use the protection caps to cover the blades when not in use.

8. TROUBLESHOOTING

- **Device not turning on:** Ensure the device is fully charged. Check the USB cable and power source.
- **Poor cutting performance:** Clean the blades thoroughly. Apply lubricating oil. Ensure guide combs are correctly attached. Blades may need replacement if dull after extended use.
- **Excessive noise or vibration:** Clean and oil the blades. If the issue persists, contact customer support.
