SETUP AND INSTALLATION

The Air Outlet Vent Cover is designed for easy installation. Follow these steps for proper mounting:

1. **Measure and Prepare:** Measure the diameter of your existing duct or opening. Ensure it matches the vent cover's diameter (110mm/4.4in for this model).
2. **Positioning:** Place the vent cover against the wall where it will be installed. Mark the positions for drilling if mounting screws are required (screws not included, typically).
3. **Drilling:** Drill pilot holes at the marked positions, if necessary, suitable for your chosen fasteners.
4. **Mounting:** Insert the vent cover's cylindrical part into the wall opening. Secure the vent cover to the wall using appropriate screws or anchors through the buckle design. Ensure it is flush and securely fastened to prevent air leaks and movement.
5. **Sealing (Optional):** For enhanced weather resistance, apply a suitable outdoor sealant around the perimeter of the vent cover where it meets the wall.
