Setup Instructions

Before you begin, ensure you have cleared enough space for assembly and have all components readily available. It is recommended to assemble the bed frame with another person for ease and safety.

Parts List:

- Headboard and Footboard sections
- Side Rails (foldable for mid-frame)
- Metal Slats
- Support Legs
- Hardware Pack (bolts, nuts, washers, Allen key)
- Foam Padding Tape

Assembly Steps:

1. **Unpack Components:** Carefully remove all parts from the packaging. Lay them out on a soft, clean surface to prevent scratches. Verify all parts are present against the included parts list.
2. **Attach Headboard and Footboard:** Connect the side rails to the headboard and footboard sections using the provided bolts and Allen key. Do not fully tighten bolts until all connections are made.
3. **Install Support Legs:** Securely attach the central support legs to the mid-frame rails.
4. **Place Slats:** Position the metal slats across the frame. The slats feature a snap-in design for easy and secure installation. Ensure each slat is properly seated.
5. **Apply Foam Padding Tape:** Apply the foam padding tape to the designated areas of the metal frame as indicated in the separate instruction sheet to prevent noise.
6. **Final Tightening:** Once all components are in place and aligned, fully tighten all bolts.
7. **Position Mattress:** Carefully place your mattress onto the assembled bed frame.

Operating Instructions

The VECELO Twin Bed Frame is designed for straightforward use. Once assembled, it provides a stable platform for your mattress without the need for a box spring.

- **Mattress Placement:** Place your twin-sized mattress directly onto the metal slats. Ensure the mattress is centered and evenly distributed on the frame.
- **Weight Distribution:** For optimal longevity and stability, distribute weight evenly across the bed frame. The twin size has a weight capacity of 450 lbs.
- **Under-bed Storage:** Utilize the 12.2 inches of under-bed clearance for storage. Ensure any storage containers or items do not obstruct the frame's stability or airflow.

Maintenance

Regular maintenance will help prolong the life of your VECELO Bed Frame and ensure continued comfort and stability.

- **Cleaning:** Wipe down the metal and wood surfaces with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners that could damage the finish.
- **Check Connections:** Periodically check all bolts and connections to ensure they remain tight. Re-tighten if necessary to maintain stability and prevent squeaking.
- **Noise Prevention:** The frame includes foam padding tape to prevent noise. If any squeaking occurs, inspect the areas where metal components meet and ensure the foam tape is intact. Reapply or add more padding if needed.
- **Weight Capacity:** Do not exceed the stated weight capacity of 450 lbs for the Twin size frame to prevent damage and ensure safety.

Troubleshooting

If you encounter any issues with your VECELO Bed Frame, refer to the following common problems and their solutions:

Problem: Bed Frame Squeaks

- **Solution 1:** Check all bolts and screws. Loose connections are a common cause of squeaking. Tighten all hardware securely.
- **Solution 2:** Inspect the foam padding tape. Ensure the foam padding tape is properly applied where metal parts connect. If it's worn or missing, replace it to reduce friction and noise.
- **Solution 3:** Verify slat placement. Ensure all slats are correctly seated in their snap-in positions and are not rubbing against the frame.

Problem: Bed Frame Feels Unstable/Wobbly

- **Solution 1:** Re-tighten all assembly bolts. A thorough tightening of all connections often resolves wobbling.
- **Solution 2:** Ensure the frame is on a level surface. Uneven flooring can cause instability. Consider using furniture pads or shims if necessary.
- **Solution 3:** Check for damaged parts. If any part appears bent or damaged, contact customer support for replacement.

Problem: Mattress Slides on Frame

- **Solution 1:** Ensure the mattress is correctly sized for the twin frame.
- **Solution 2:** Consider placing a non-slip mat or rug gripper between the mattress and the slats to increase friction.

Warranty and Support

VECELO provides a **24-month warranty** and a **30-day free return service** for this product. If you encounter any problems with the bed frame you received, such as missing parts, damage, or functional issues, please do not hesitate to contact VECELO customer service. They will assist you in obtaining free replacement parts or a brand-new item.
