SAFETY INFORMATION

WARNING:

- This vanity is heavy (approximately 54 pounds) and requires secure wall mounting.
- Always use proper lifting techniques to prevent injury.
- Ensure the wall structure can adequately support the weight of the vanity and its contents.
- Do not attempt to install or move the vanity without assistance.
- Always follow the included assembly and installation instructions to ensure safe and proper setup.
- Professional installation is recommended for plumbing and electrical connections (if applicable).

PACKAGE CONTENTS

Your SOLIDEE Floating Bathroom Vanity is shipped in two separate packages. Please verify all components are present before beginning assembly.

Shipped in Two Boxes

Package 1

- 1 x Main cabinet
- 1 x All hardware includes

SETUP AND INSTALLATION

This vanity requires self-assembly and wall-mounting. Please follow the step-by-step instructions provided in the included Installation Manual. Below are general guidelines:

- 1. Unpack and Inspect:** Carefully unpack all components from both packages. Check for any damage or missing parts. Contact customer support immediately if issues are found.
- 2. Gather Tools:** Ensure you have all necessary tools for assembly and installation (e.g., screwdriver, drill, level, measuring tape, stud finder).
- 3. Assemble Cabinet:** Follow the detailed instructions in the Installation Manual to assemble the MDF wood cabinet. Pay attention to the drawer and door mechanisms.
- 4. Prepare Wall:** Identify suitable wall studs for secure mounting. Mark the desired height and position for the vanity. Ensure plumbing lines are accessible.
- 5. Mount Cabinet:** With assistance, lift and securely mount the cabinet to the wall using the provided mounting hardware. Use a level to ensure it is straight.
- 6. Install Sink and Faucet:** Place the ceramic vessel sink on the vanity top. Install the faucet, pop-up drain, and connect the hot/cold water lines according to the plumbing instructions. Ensure all connections are watertight.
- 7. Final Checks:** Test the faucet for leaks and proper water flow. Verify the drawer and door operate smoothly.

OPERATION

The SOLIDEE Floating Bathroom Vanity is designed for straightforward use.

- **Drawer:** Pull the drawer gently to open and push to close. Avoid slamming to preserve the drawer slides.
- **Cabinet Door:** Open the cabinet door to access the storage space. Close firmly but gently.
- **Sink and Faucet:** Operate the faucet as a standard bathroom fixture. Ensure the pop-up drain functions correctly to retain or release water.
- **Storage:** Utilize the drawer, cabinet, and open shelf for organizing bathroom essentials. Distribute weight evenly within the storage areas.

MAINTENANCE

Regular cleaning and proper care will extend the life and appearance of your vanity.

- **Cabinet:** Wipe the engineered wood surfaces with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that can damage the finish. Dry immediately to prevent water damage.
- **Ceramic Sink:** Clean the ceramic sink with mild soap and water. For stubborn stains, a non-abrasive bathroom cleaner can be used. Rinse thoroughly and dry. Avoid dropping heavy objects into the sink to prevent chipping or cracking.

- **Faucet and Hardware:** Clean the faucet and metal hardware with a soft cloth and mild cleaner. Avoid abrasive pads or cleaners that can scratch the finish.
- **Spills:** Wipe up any water spills on the vanity surface immediately to prevent moisture damage.
- **Hinges and Slides:** Periodically check hinges and drawer slides for smooth operation. Lubricate with a silicone-based spray if necessary.

TROUBLESHOOTING

If you encounter issues with your vanity, refer to the following common solutions:

Problem	Possible Cause	Solution
Vanity feels unstable after mounting.	Improper wall mounting; not secured to studs.	Ensure vanity is securely fastened to wall studs. Re-check mounting hardware. Consult a professional if unsure.
Drawer or door does not close smoothly.	Misaligned hinges or drawer slides; obstruction.	Check for obstructions. Adjust hinges or drawer slides as per the assembly manual.
Faucet leaks.	Loose plumbing connections; faulty O-rings.	Tighten all water line connections. If leaking persists, check O-rings or consult a plumber.
Water drains slowly from sink.	Pop-up drain obstruction; improper drain installation.	Clear any debris from the pop-up drain. Verify the drain is installed correctly and not overtightened.

For issues not covered here, please contact SOLIDEE customer support.

WARRANTY INFORMATION

Specific warranty details are typically provided with your purchase documentation or can be found on the manufacturer's official website. Please retain your proof of purchase for any warranty claims.

General protection plans may be available for purchase separately. Refer to your purchase details for more information on these plans.
