The TOSY Magnet Fidget Spinner Mini comes pre-assembled as individual magnetic blocks. No complex setup is required. Simply remove the blocks from the packaging to begin use.

## OPERATING INSTRUCTIONS

---

The TOSY Magnet Fidget Spinner Mini offers multiple modes of play:

### 1. Transformable Fidget Spinner

To create a fidget spinner, arrange the magnetic blocks around the central stainless steel bearing. The magnets will naturally connect the blocks to form a circular or multi-lobed spinner shape. Hold the center bearing and flick the outer blocks to initiate spinning. Experiment with different block arrangements to create unique spinner designs and observe their rotational dynamics.

## **2. Infinity Cube**

The magnetic blocks can be folded and unfolded to form an infinity cube. Connect the blocks in a 2x2 square formation, then manipulate the hinges created by the magnets to continuously fold and unfold the cube. This action provides a satisfying tactile experience for stress relief and focus.

## **3. 2x2 Puzzle Cube**

The blocks can be arranged to form a 2x2x2 cube. Once formed, the individual blocks can be rotated along their magnetic connections, similar to a traditional puzzle cube. The goal is to align colors or patterns on each face of the cube. This mode enhances problem-solving skills and spatial reasoning.

## **4. Magnetic Building Blocks**

Utilize the 8 magnetic blocks to construct various shapes, figures, and structures. The embedded magnets allow for secure connections and easy reconfiguration. Combine multiple sets for larger and more complex creations. This mode encourages creativity and fine motor skills.

## MAINTENANCE

- **Cleaning:** Wipe the blocks with a soft, dry cloth. For stubborn dirt, a slightly damp cloth can be used, followed by immediate drying. Do not immerse in water.
- **Storage:** Store the blocks in a cool, dry place away from direct sunlight and extreme temperatures. Keep them in their original packaging or a designated container to prevent loss.
- **Magnet Care:** Avoid dropping the blocks from significant heights, as this may damage the internal magnets or the plastic casing.

## TROUBLESHOOTING

- **Spinner not smooth:** Ensure the blocks are properly aligned around the central bearing. Check for any debris obstructing the bearing's rotation.
- **Blocks not holding together:** Verify that the magnetic surfaces are clean and free from obstructions. Ensure the blocks are correctly oriented for magnetic attraction.
- **Lost parts:** If a block is lost, additional sets may be purchased to expand your collection.
