5. SETUP AND INSTALLATION

Follow these steps for proper installation of your BACHMANN PIX Built-in Socket. Ensure power is disconnected before proceeding.

1. **Prepare Mounting Hole:** Using appropriate tools, create a circular mounting hole in your desired surface. Refer to the dimension diagram below.

3. **Insert Socket Unit:** Carefully insert the PIX socket unit into the prepared mounting hole. The unit

should fit snugly.

4. **Attach Decorative Ring:** Choose your preferred decorative ring (black, white, or stainless steel look) and snap it onto the socket unit. Ensure it is securely seated.
5. **Restore Power:** Once installation is complete and all connections are secure, restore power to the circuit.

6. OPERATION

The BACHMANN PIX Built-in Socket operates like any standard power outlet. Once installed and powered, simply plug in your electrical devices to use them. Ensure that the total power consumption of connected devices does not exceed the socket's maximum rated capacity.

7. MAINTENANCE

- **Cleaning:** To clean the socket, first disconnect power. Use a soft, dry cloth. Do not use abrasive cleaners or solvents.
- **Decorative Rings:** The decorative rings can be easily removed and replaced if you wish to change the aesthetic or clean underneath them. Gently pry off the ring and snap the new one into place.
- **Inspection:** Periodically inspect the socket for any signs of wear, damage, or loose connections. If any issues are found, disconnect power and consult a qualified electrician.

8. TROUBLESHOOTING

If you encounter issues with your PIX Built-in Socket, consider the following:

- **No Power:**
 - Check if the main power supply to the circuit is active.
 - Verify that the circuit breaker or fuse for the circuit has not tripped.
 - Ensure all wiring connections are secure and correctly made. If in doubt, consult a qualified electrician.
- **Loose Connection:** If a device feels loose when plugged in, disconnect power and inspect the socket for any damage or debris. Do not force plugs into the socket.

For problems not resolved by these steps, contact a qualified electrician or Bachmann customer support.
