ShiftCam S-AA03

ShiftCam SnapGrip Pro User Manual

Model: S-AA03
Brand: ShiftCam

Introduction

The ShiftCam SnapGrip Pro is a versatile mobile accessory designed to enhance your smartphone photography and videography experience. It combines an ergonomic camera grip, a wireless shutter button, and a powerful Qi2 wireless charging power bank, all in a compact and portable design. The magnetic mount ensures quick and secure attachment to MagSafe-compatible devices and can be used with other phones via a MagSafe sticker or case (sold separately).

Image: The ShiftCam SnapGrip Pro attached to a smartphone, highlighting its ergonomic grip and magnetic connection.

Setup

1. Initial Charging of SnapGrip Pro

Before first use, fully charge your SnapGrip Pro. It features a USB-C PD input for rapid charging. Connect a USB-C charger (not included) to the USB-C port on the SnapGrip Pro.

- The SnapGrip Pro has a 5000mAh battery capacity.
- A USB-C PD 20W input is recommended for optimal charging speed.

Image: Internal view of the SnapGrip Pro's charging components, illustrating its Qi2 wireless charging technology.

2. Attaching to Your Smartphone

The SnapGrip Pro utilizes a seamless magnetic mount for quick attachment.

- **MagSafe Compatible Devices:** Simply align the SnapGrip Pro with the MagSafe area on the back of your iPhone 12 series or above. The magnets will securely snap it into place. If using a case, ensure it is MagSafe-enabled.
- **Other Smartphones:** For Samsung, Motorola, Pixel, LG, OnePlus, Huawei, Xiaomi, and other non-MagSafe phones, you will need a MagSafe sticker or a MagSafe-compatible case (purchased separately) to enable magnetic attachment.

Image: Visual guide demonstrating compatibility with MagSafe-enabled iPhones and other smartphones via a MagSafe sticker or case.

3. Bluetooth Pairing for Shutter Control

To use the wireless shutter button, you must pair the SnapGrip Pro with your smartphone via Bluetooth.

1. Ensure the SnapGrip Pro is charged.
2. Press and hold the small button on the SnapGrip Pro (usually near the shutter button) to enter pairing mode. An indicator light may flash.
3. On your smartphone, go to **Settings** > **Bluetooth**.
4. Look for "SnapGrip Pro" or a similar device name in the list of available devices and select it to pair.
5. Once paired, the indicator light on the SnapGrip Pro will typically become solid, and your phone will confirm the connection.

Operating Instructions

1. Using the Wireless Shutter Button

Once paired via Bluetooth, the large button on the SnapGrip Pro functions as a camera shutter button.

- Open your smartphone's camera application.
- Press the large button on the SnapGrip Pro to capture photos or start/stop video recording, just like a traditional camera.

Image: A user holding their phone with the SnapGrip Pro, illustrating how the index finger naturally rests on the shutter button for easy photo capture.

2. Charging Your Smartphone

The SnapGrip Pro features Qi2 wireless charging to power your smartphone.

- Ensure your smartphone is magnetically attached to the SnapGrip Pro.
- Press the small power button on the SnapGrip Pro to initiate wireless charging. An indicator light will typically illuminate to confirm charging is active.
- The SnapGrip Pro offers 15W Qi2 wireless charging output, capable of charging compatible smartphones from 0 to 50% in approximately 30 minutes (e.g., iPhone 15).

Image: An infographic illustrating the SnapGrip Pro's advanced charging features, including its 5000mAh battery and rapid USB-C PD output.

3. Rotational Docking and Tabletop Use

The SnapGrip Pro features a 180-degree pivotal system and can act as a tabletop dock.

- **Switching Orientation:** With your phone attached, gently rotate the SnapGrip Pro to switch between portrait and landscape modes.
- **Tabletop Dock:** The design allows the SnapGrip Pro to stand upright on a flat surface, providing a stable base for hands-free operation during video calls, content viewing, or live streams.

Image: A user demonstrating the 180-degree pivotal system, easily switching the phone's orientation while attached to the SnapGrip Pro.

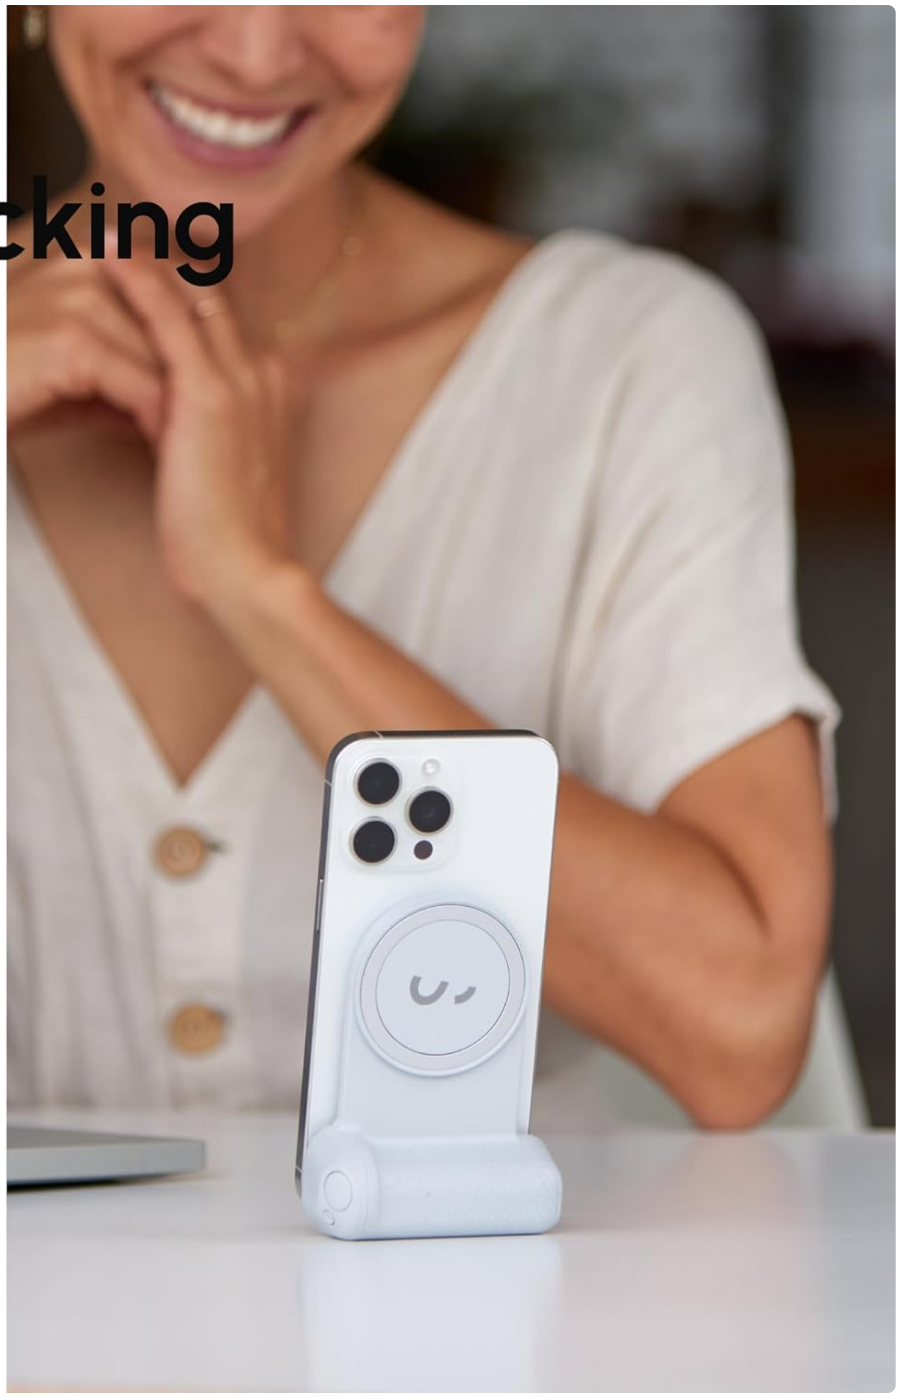

Image: The SnapGrip Pro functioning as a stable tabletop dock, allowing for hands-free viewing or video calls.

Maintenance

Proper care will ensure the longevity of your SnapGrip Pro.

- **Cleaning:** Wipe the surface of the SnapGrip Pro with a soft, dry, or slightly damp cloth. Avoid using harsh chemicals or abrasive materials.
- **Storage:** Store the SnapGrip Pro in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** For optimal battery health, avoid fully discharging the device frequently. If storing for extended periods, charge it to approximately 50% before storage.

Troubleshooting

1. SnapGrip Pro Not Charging or Charging Slowly

- **Check Cable and Adapter:** Ensure you are using a functional USB-C cable and a power adapter that meets the 20W PD specification.
- **Proper Connection:** Verify the USB-C cable is fully inserted into the SnapGrip Pro's charging port.
- **Phone Alignment:** For wireless charging, ensure your phone is correctly aligned with the magnetic charging area on the SnapGrip Pro.
- **Case Interference:** If using a phone case, ensure it is MagSafe-compatible and not too thick, as it might impede wireless charging efficiency.

2. Wireless Shutter Button Not Responding

- **Bluetooth Connection:** Confirm that the SnapGrip Pro is successfully paired and connected to your smartphone via Bluetooth. Go to your phone's Bluetooth settings to check the connection status. If disconnected, attempt to re-pair.
- **Battery Level:** Ensure the SnapGrip Pro has sufficient battery charge.
- **App Compatibility:** While generally compatible with most camera apps, ensure you are using a standard camera application.
- **Shutter Lag:** A slight delay between pressing the shutter button and the photo being taken may occur in some instances. This is typically minimal and does not affect functionality.

3. Rapid Battery Drain of SnapGrip Pro

- **Bluetooth Connection:** The SnapGrip Pro can drain faster if left connected via Bluetooth when not in use. To conserve battery, disconnect Bluetooth when not actively using the shutter function.
- **Accidental Trigger:** If stored in a bag or pocket, the shutter button can be accidentally pressed, waking the device and leading to battery drain. Consider storing it in a way that prevents accidental button presses.
- **Auto-Sleep:** The device has an auto-sleep function, but accidental button presses can restart it.

4. Device Overheating During Use

- **Normal Operation:** Some warmth during charging or extended use is normal.
- **Excessive Heat:** If the SnapGrip Pro or your phone becomes excessively hot to the touch, discontinue use immediately.
- **Environmental Factors:** Avoid using or charging the device in direct sunlight or hot environments.
- **Ventilation:** Ensure adequate airflow around the device during use.
- **Contact Support:** If overheating persists and is severe, contact ShiftCam customer support.

Specifications

Model Number	S-AA03
Battery Capacity	5000mAh (18.5Wh, 3.7V)
Wireless Charging Output	15W (Qi2 Certified)
USB-C Output	20W PD (DC 5V/2A, 9V/2.22A)
USB-C Input	20W PD (DC 5V/2A, 9V/2.22A)
Net Weight	183g (6.45 oz)
Dimensions	113.3 x 86.8 x 37.2mm (4.46 x 3.42 x 1.46 inches)

Mounting Type	MagSafe Mount
Color	Midnight
Country of Origin	China

Note: A USB-C charger is required to charge the SnapGrip Pro and is not included in the package.
