UPPAbaby Mesa V2

UPPAbaby Mesa V2 Infant Car Seat Instruction Manual

Model: Mesa V2 | Brand: UPPAbaby

Welcome to Your UPPAbaby Mesa V2 Infant Car Seat

The UPPAbaby Mesa V2 Infant Car Seat is designed to provide superior safety and comfort for your child from 4 to 35 lbs and up to 32 inches in height. This manual provides essential information for proper installation, use, and maintenance of your car seat, ensuring a secure and comfortable ride for your infant.

Package Contents

Your UPPAbaby Mesa V2 Infant Car Seat package includes the following components:

- Mesa V2 Infant Car Seat Carrier
- Infant Car Seat Base
- Robust Infant Insert (recommended for infants 4-11 lbs)

Key Features

- **Protection From All Sides:** The adjustable headrest is reinforced with EPP foam to help absorb energy. Side Impact Protection keeps baby's head protected during a collision. The 4th anti-rebound handle position allows for increased safety in rebound and rear-impact collisions.

Image: The robust infant insert and adjustable headrest designed for optimal fit and side impact protection.

- **Install in Seconds:** Installation is quick and simple with the innovative SmartSecure system, auto-retracting LATCH design, red to green tightness indicator, and four-position adjustable foot.
- **European Routing:** Provides a safe and secure carrier-only installation when the use of a base isn't convenient. The belt path easily secures the carrier at three points of contact to reduce movement.

Image: The Mesa V2 demonstrating base-free installation using European routing for convenience during travel.

- **Fire Retardant Free Fabrics:** The Mesa V2 is made with fabrics that are free from fire retardant chemicals, including the large UPF 25+ hideaway Canopy.
- **Robust Infant Insert Included:** The removable infant insert is designed to provide better fit and body positioning for babies approximately 4 – 11 lbs.
- **Buckle Up with Confidence:** A simple one-crotch buckle position and no-rethread, adjustable harness make buckling up a breeze.
- **UPF 25+ Hideaway Canopy:** The extra-large integrated, extendable canopy provides more protection outside and conveniently tucks away when not in use.
- **Convenient Release Button:** A quick press of the button on the top of the carrier handle releases it from the frame, allowing seamless transitions from stroller to car.
- **Performance Travel System:** For ultimate portability and safety, the Mesa V2 directly attaches to both VISTA and CRUZ strollers without adapters. It is compatible with the MINU and RIDGE with the use of adapters.

Setup and Installation

Proper installation is crucial for your child's safety. Always refer to the full instruction manual provided with your car seat for detailed steps and diagrams. The Mesa V2 offers two primary installation methods:

1. Installation with Base (LATCH or Vehicle Seatbelt)

The Mesa V2 base features the SmartSecure System for easy and accurate installation. The visual indicator changes from red to green when the base is correctly installed, minimizing guesswork.

1. **LATCH Installation:** Extend the auto-retracting LATCH connectors from the base and attach them to your vehicle's lower anchors. Press down firmly on the base until the SmartSecure indicator turns green.
2. **Vehicle Seatbelt Installation:** Route the vehicle's lap and shoulder belt through the designated belt path on the base.

Lock the seatbelt and apply pressure to the base until the SmartSecure indicator turns green.

2. Base-Free Installation (European Routing)

For convenience when traveling or using multiple vehicles, the Mesa V2 can be installed without its base using European Routing. This method provides a secure fit by routing the vehicle's shoulder belt around the back of the car seat.

1. Place the car seat on the vehicle seat.
2. Route the lap belt portion through the belt guides on the car seat.
3. Extend the shoulder belt around the back of the car seat and secure it through the designated European routing guide.
4. Ensure the car seat is tightly secured and does not move more than one inch side-to-side or front-to-back at the belt path.

Operating Your Car Seat

Harness and Headrest Adjustment

The Mesa V2 features a no-rethread harness that adjusts simultaneously with the headrest, simplifying proper fit as your child grows. To adjust, squeeze the headrest adjustment lever located at the top of the seat and slide the headrest up or down to the appropriate height. The harness straps should be at or just below your child's shoulders when rear-facing.

Stroller Attachment and Release

The Mesa V2 is designed for seamless integration with UPPAbaby VISTA and CRUZ strollers. Simply align the car seat with the stroller's adapters and click it into place. To release, press the convenient release button located on the top of the car seat's carry handle and lift the car seat off the stroller frame.

Canopy Use

The integrated UPF 25+ hideaway canopy can be extended for sun protection and privacy. Simply pull it forward to deploy and push it back to retract when not needed.

Care and Maintenance

Regular cleaning and maintenance will help prolong the life of your Mesa V2 Infant Car Seat.

- **Fabric Care:** The seat fabric is easily removable and washable. Machine wash in cold water on a gentle cycle with mild detergent. **DO NOT BLEACH.** Dry flat and away from direct sunlight before re-use or storage.**DO NOT IRON OR DRY CLEAN.**
- **Harness and Buckle:** Wipe clean with a damp cloth. Do not immerse the buckle in water.
- **Plastic and Metal Parts:** Wipe clean with a damp cloth and mild soap.

Troubleshooting Common Issues

If you encounter any issues with your Mesa V2 Infant Car Seat, please refer to the following common solutions:

- **Loose Installation:** Ensure the SmartSecure indicator is green. Re-read the installation instructions carefully, applying firm pressure to the base or car seat during installation. Check that the LATCH connectors or vehicle seatbelt are properly routed and tightened.
- **Harness Too Tight/Loose:** Adjust the headrest and harness height to ensure a snug fit. The harness should be snug against your child's body, with no slack.
- **Stroller Attachment Difficulty:** Ensure the car seat is correctly aligned with the stroller adapters. Check for any obstructions and ensure the release button is fully depressed when detaching.
