TROUBLESHOOTING

If your unit is not operating as expected, please refer to the following common issues and solutions before contacting customer support.

Common Issues:

- **Unit does not turn on:** Ensure the unit is properly plugged into a functioning 230V outlet. Check the circuit breaker.
- **Insufficient cooling/heating:** Verify that the air filter is clean. Ensure windows and doors are closed to prevent air leakage. Check for obstructions around the unit's air intake and exhaust.
- **Unusual noises:** Some operational noises are normal. If noises are excessive or unusual, ensure the unit is securely installed and not vibrating against the window frame.
- **Water leakage:** Ensure the unit is slightly tilted outwards to allow proper drainage of condensation.

For issues not resolved by these steps, please contact Whirlpool customer support.
