

BOBLOV Body Camera Magnet Mount & KJ23Pro

BOBLOV Body Camera Magnet Mount and KJ23Pro Body Camera User Manual

Model: Body Camera Magnet Mount & KJ23Pro

1. INTRODUCTION

This manual provides essential instructions for the proper use and maintenance of your BOBLOV Body Camera Magnet Mount and the BOBLOV KJ23Pro 2K Body Camera. The magnet mount is designed for secure attachment of your body camera to clothing, ensuring stability during use. The KJ23Pro body camera offers high-resolution video and photo capture with advanced features for reliable documentation.

2. MAGNET MOUNT SETUP

The BOBLOV Body Camera Magnet Mount features a two-piece design with six strong magnets to ensure a firm grip on your clothing. Follow these steps for proper installation:

- 1. Identify the 'Inside' and 'Outside' Pieces:** The magnet mount consists of two distinct parts. One piece is marked 'Inside' and the other 'Outside'.
- 2. Position the 'Inside' Piece:** Place the 'Inside' piece of the magnet mount on the interior of your clothing, against your body.
- 3. Position the 'Outside' Piece:** Place the 'Outside' piece on the exterior of your clothing, aligning it directly over the 'Inside' piece. The magnets will attract, securing the mount to your clothing.
- 4. Attach the Body Camera:** Use the short clip on your BOBLOV body camera to attach it to the middle protrusion on the 'Outside' piece of the magnet mount. Ensure the camera is securely fastened.

Important Note: This magnet mount is designed for use with body cameras that have a *short clip*. It is **not suitable** for cameras equipped with a long clip, as this may affect stability and security.

Distinguish Inside and Outside to Install

Figure 2.1: Distinguishing the 'Inside' and 'Outside' components for proper installation.

The image above illustrates how to differentiate between the 'Inside' and 'Outside' parts of the magnet mount, which is crucial for correct placement on your clothing.

Strong Magnetic Force

Six magnets attract each other to form the strongest Power

Figure 2.2: The six-magnet design provides strong magnetic force for secure attachment.

This image highlights the strong magnetic attraction between the two mount pieces, ensuring your body camera remains stable and does not shift during activity.

Capture in 2K Clarity

Enjoy stunning images for high-definition viewing

Figure 2.3: Compatibility guidance: The mount is designed for short clips, not long clips.

As shown, the magnet mount is specifically designed for body cameras with a standard short clip. Using it with a long clip is not recommended and may compromise stability.

3. KJ23Pro BODY CAMERA OPERATION

The BOBLOV KJ23Pro body camera is engineered for reliable performance in various conditions. Here are key operational features:

- **High-Resolution Recording:** The camera captures video in 2K resolution and photos at 38MP, providing clear and detailed footage for documentation.
- **Extended Battery Life:** Equipped with a 4000mAh internal battery, the KJ23Pro supports up to 15 hours of

continuous recording at 1080P, ideal for long shifts.

- **Night Vision Capability:** Integrated night vision ensures clear recording even in low-light or complete darkness conditions.
- **Loop Recording:** The camera supports loop recording, allowing for continuous recording by overwriting the oldest files when storage is full. It supports long video fragments, typically defaulting to 10-minute segments.

Figure 3.1: Example of the BOBLOV KJ23Pro body camera mounted on a uniform.

This image demonstrates the practical application of the body camera, securely attached to a uniform, ready for use.

Built-in 4000mAh Large Battery

Recording time 15Hs (Test data)

Figure 3.2: The KJ23Pro captures footage in 2K clarity for detailed viewing.

The image emphasizes the high-definition video capability of the KJ23Pro, ensuring critical details are captured with precision.

Night Vision Capability

Ensure clear footage in the lowest light conditions.

Figure 3.3: The KJ23Pro's 4000mAh battery provides up to 15 hours of continuous recording.

This visual confirms the extended battery life, making the KJ23Pro suitable for prolonged operational periods without frequent recharging.

This image illustrates the loop recording functionality, which allows users to select preferred video segment lengths for continuous recording.

4. MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your BOBLOV products.

- **Cleaning the Magnet Mount:** The magnet mount is made of high-quality soft silicone. It can be easily cleaned with a damp cloth. Avoid harsh chemicals or abrasive materials that could damage the silicone.
- **Camera Care:** Keep the camera lens clean and free from dust and smudges. Use a soft, lint-free cloth specifically designed for optical surfaces.
- **Storage:** Store both the magnet mount and the body camera in a cool, dry place away from direct sunlight and extreme temperatures.

- **Battery Care:** For optimal battery life, avoid fully discharging the camera frequently. Charge the camera regularly, even if not in use for extended periods.

Use High-Quality Black Silicone Materials, Soft and Elastic

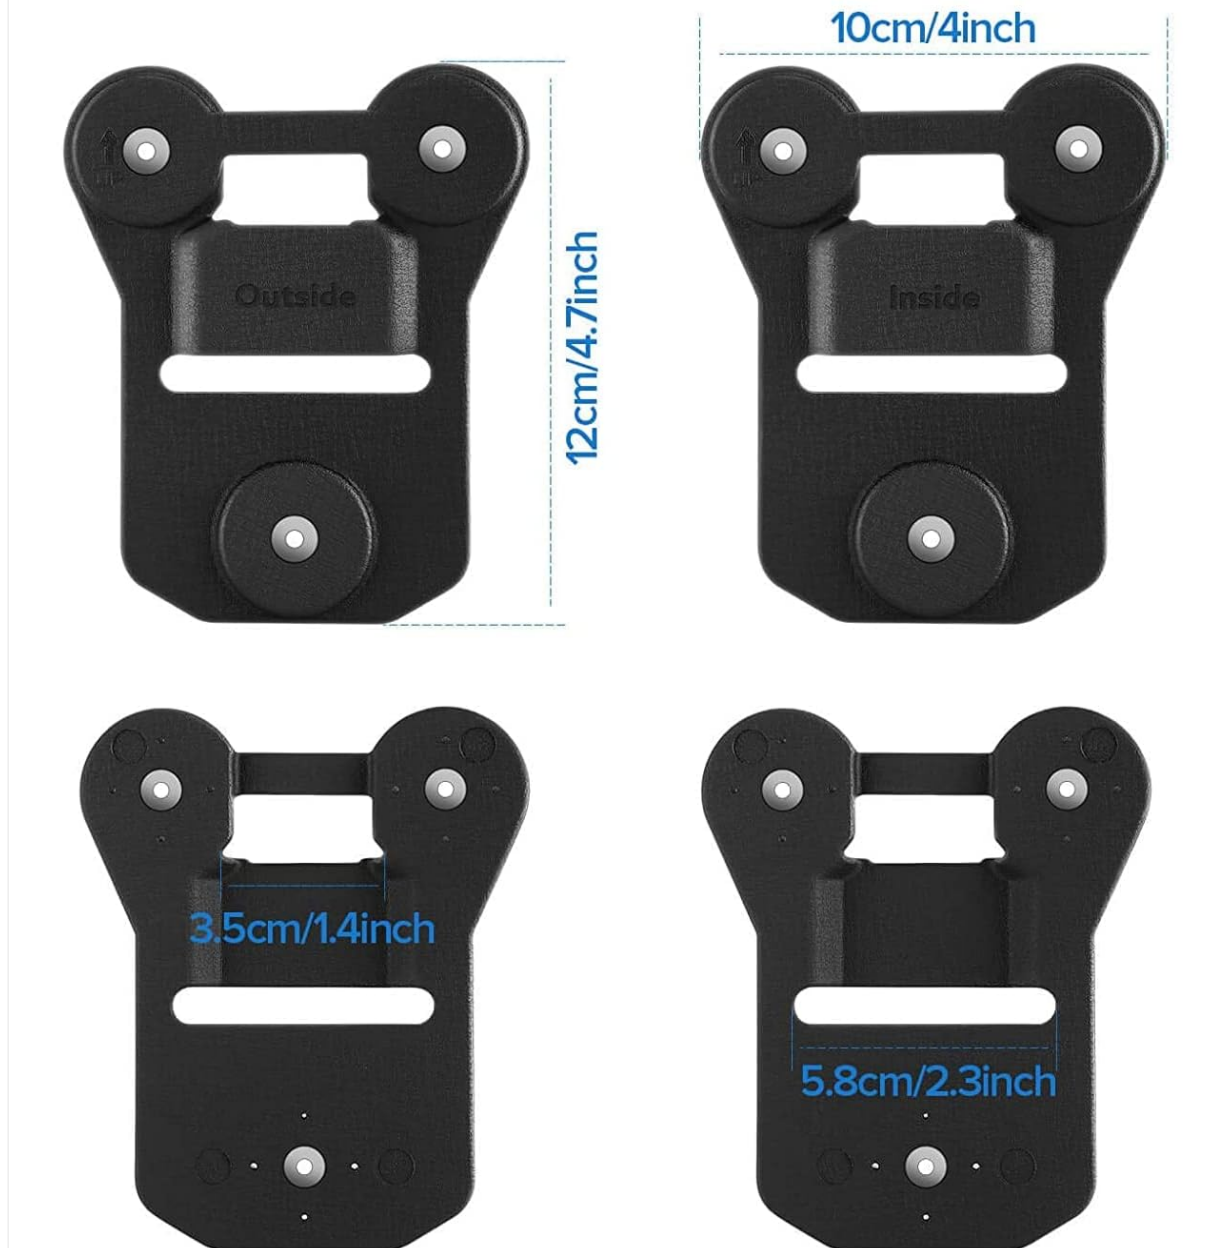

Figure 4.1: The magnet mount is constructed from soft, elastic silicone for durability and ease of cleaning.

This image provides a visual of the mount's dimensions and highlights its silicone construction, which is easy to maintain.

5. TROUBLESHOOTING

If you encounter issues with your BOBLOV products, refer to the following common troubleshooting steps:

- **Camera Not Turning On:**
 - Ensure the battery is fully charged. Connect the camera to a power source and allow it to charge for at least 30 minutes.
 - Press and hold the power button for several seconds.

- **Recording Issues (e.g., not recording, corrupted files):**
 - Check if the memory card is properly inserted and has sufficient free space.
 - Format the memory card (refer to camera settings for instructions).
 - Ensure the camera's firmware is up to date.
- **Magnet Mount Not Holding Securely:**
 - Verify that the 'Inside' and 'Outside' pieces are correctly aligned and placed on opposite sides of the clothing.
 - Ensure the clothing material is not excessively thick, which could weaken the magnetic force.
 - Confirm that the body camera is attached with a short clip, as long clips may cause instability.
- **Poor Night Vision Quality:**
 - Ensure the night vision feature is activated in the camera settings.
 - Clean the camera lens to remove any obstructions.

6. SPECIFICATIONS

Feature	Specification
Brand	BOBLOV
Model Name (Camera)	KJ23Pro
Model Number (Camera)	KJ23Pro
Compatible Devices	Cameras (specifically BOBLOV body cameras with short clips)
Magnet Mount Material	Silicone
Magnet Mount Feature	6pcs Strong Magnetic Force, Two-piece design
Magnet Mount Dimensions (Approx.)	Height: 12cm (4.7in), Width: 10cm (4in), Clip Width: 3.5cm (1.4in), Magnet Width: 5.8cm (2.3in)
Video Resolution (Camera)	2K
Photo Resolution (Camera)	38MP
Battery Capacity (Camera)	4000mAh
Recording Time (Camera)	Up to 15 hours (at 1080P)
Special Features (Camera)	Night Vision, Loop Recording, Lightweight
