2. SETUP

Follow these steps for initial setup of your TopScan Pro device:

- Download the Application:** For iOS devices, download the 'TOPGURU' app from the App Store. For Android devices, download the 'TopScan' app from Google Play.
- Connect to Vehicle:** Locate your vehicle's OBD2 port (typically under the dashboard) and firmly plug in the TopScan Pro device.
- Turn on Ignition:** Turn your vehicle's ignition to the 'ON' position (engine off).
- Pair via Bluetooth:** Open the downloaded app on your mobile device. The app will guide you through the Bluetooth pairing process with the TopScan Pro. Ensure Bluetooth is enabled on your mobile device.

4. MAINTENANCE PROCEDURES

The TopScan Pro is designed to assist with various vehicle maintenance tasks. Utilize the 13+ hot service functions detailed in Section 3.2 to perform routine maintenance such as resetting oil life indicators, adapting throttle bodies, or performing DPF regenerations. Always refer to your vehicle's specific service manual for recommended maintenance intervals and procedures.

5. TROUBLESHOOTING

If you encounter issues while using your TopScan Pro, consider the following:

- **Connection Issues:** Ensure the TopScan Pro is securely plugged into the OBD2 port and your mobile device's Bluetooth is enabled and paired correctly.
- **App Not Responding:** Close and restart the TOPGURU/TopScan app. If the issue persists, try restarting your mobile device.
- **Diagnostic Errors:** Verify that your vehicle's ignition is in the 'ON' position. Some functions may require the engine to be running.
- **Software Updates:** Ensure your app and vehicle software (downloadable through the app) are up to date. Outdated software can cause compatibility issues.
- **Fault Code Interpretation:** Use the app's built-in DTC Repair Guide and Technical Service Bulletins for detailed explanations and repair suggestions for retrieved fault codes.
