5. OPERATING INSTRUCTIONS

The OLIXIS Wood Lift Top Coffee Table offers versatile functionality with its adjustable tabletop and integrated storage.

The tabletop can be effortlessly raised to an elevated height of approximately 6.3 inches (16 cm). This feature allows the table to function as a temporary dining surface or a comfortable workstation for a laptop.

1. **To Lift:** Gently pull the front edge of the liftable tabletop upwards. The high-quality metal mechanism will assist in a smooth, quiet lift.

6. MAINTENANCE

Proper care will extend the life and appearance of your coffee table.

- **Cleaning:** Wipe the table surfaces with a damp cloth. Avoid using harsh chemicals or abrasive cleaners, which can damage the finish.
- **Spills:** The table is not stain-resistant. Promptly wipe up any spills to prevent staining or damage to the wooden grain finish.
- **Protection:** Use coasters under drinks and placemats under hot items to protect the tabletop from heat and moisture rings.
- **Mechanism Care:** Periodically check the lift mechanism for smooth operation. If it becomes stiff or noisy, ensure no debris is obstructing it. Lubrication with a silicone-based spray may be applied sparingly if needed, following product instructions.

7. TROUBLESHOOTING

If you encounter issues with your OLIXIS coffee table, refer to the following common solutions:

- **Table Wobbles:** If the table feels unstable after assembly, re-check all fasteners to ensure they are securely tightened. Verify that all legs are evenly installed and making full contact with the floor.
- **Lift Top Not Smooth/Noisy:** Check for any obstructions in the lift mechanism. Ensure the mechanism is clean. If necessary, apply a small amount of silicone lubricant to the moving parts.
- **Tabletop Panels Misaligned:** If the liftable and fixed tabletop panels do not align perfectly, this can often be adjusted by slightly repositioning the hinges on the movable top. Loosen the hinge screws, adjust the panel, and then re-tighten.
- **Difficulty Opening Hidden Compartment:** Ensure the lift top is fully raised. The notch on the side of the table is designed for easy opening; ensure your fingers are positioned correctly.
