SETUP AND ASSEMBLY

Follow these steps carefully to assemble your bed frame. It is recommended to have two people for assembly.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, soft surface. Identify each component using the provided parts list.

2. **Attach Side Rails to Headboard:** Connect the side rails to the upholstered headboard using the designated bolts and washers. Hand-tighten initially.
3. **Attach Side Rails to Footboard:** Connect the other end of the side rails to the footboard. Ensure the footboard with drawers is correctly oriented. Hand-tighten initially.
4. **Install Center Support:** Secure any central support beams or legs if included, following the specific instructions in your package.
5. **Insert Slats:** Place the wooden slats across the bed frame. The slats feature a buckle design for easy installation. Ensure they are evenly spaced and securely fastened. Install the metal bed slat at the head of the bed as indicated.
6. **Final Tightening:** Once all components are in place and aligned, fully tighten all bolts and screws using the provided Allen wrench. Do not overtighten.
7. **Drawer Installation:** The four drawers are integrated into the footboard. Ensure their casters are properly aligned for smooth operation. The button design on top of the drawers helps secure them in place and prevent accidental sliding.

OPERATING INSTRUCTIONS

Adjustable Headboard

The upholstered headboard can be adjusted to two different heights to accommodate mattresses of varying thicknesses. The recommended mattress thickness is 10-14 inches.

- To adjust the headboard height, locate the adjustment points on the headboard supports.
- Loosen the securing bolts, raise or lower the headboard to the desired position (40 or 44 inches high), and then re-tighten the bolts firmly.

Storage Drawers

The bed frame includes four integrated storage drawers for convenient organization.

- To open a drawer, gently pull the handle. The drawers are equipped with casters for smooth movement.
- To close a drawer, push it back into the frame until it is flush. The button design on the top of the drawer helps secure it in place and prevent accidental sliding.
- These drawers are ideal for storing bed sheets, off-season clothing, or other bedroom essentials.

MAINTENANCE

Cleaning the Upholstery

The bed frame is upholstered with high-grade PU leather, which is designed for easy cleaning.

- For general cleaning, wipe the upholstered surfaces with a soft, damp cloth.
- For spills, blot immediately with a clean, dry cloth. Avoid rubbing, as this can spread the stain.
- Do not use harsh chemicals, abrasive cleaners, or solvents, as these can damage the PU leather.
- Allow the surface to air dry completely after cleaning.

Frame Care

- Periodically check all bolts and screws to ensure they remain tight. Re-tighten as necessary to maintain stability.

- Avoid dragging the bed frame when moving it. Lift the frame to prevent damage to the legs and floor.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed frame is wobbly or unstable.	Loose bolts or screws.	Check and tighten all assembly bolts and screws. Ensure all connections are secure.
Squeaking noises.	Loose connections; friction between parts.	Tighten all bolts. If squeaking persists, disassemble and reassemble affected sections, ensuring all parts are correctly aligned. Applying a small amount of lubricant (e.g., silicone spray) to contact points between metal parts may help.
Drawers do not slide smoothly.	Casters are misaligned or obstructed; drawer contents are too heavy.	Check that the drawer casters are clean and properly aligned within their tracks. Ensure the drawer is not overloaded.
Headboard height adjustment issues.	Securing bolts are too tight or misaligned.	Loosen the headboard securing bolts completely, adjust to the desired height, and then re-tighten evenly.
