An overview of the items included in the camera package, such as the camera, batteries, memory card, and various accessories.

3. SETUP

3.1 Installing the Memory Card and Battery

1. Push the TF card into its slot until it clicks into place. Ensure the card is inserted in the correct orientation.
2. Slide or press the lock to release the battery cover.
3. Insert the battery with correct direction, aligning the contacts properly.
4. Close the battery cover securely until it locks.

Visual instructions demonstrating the proper steps for inserting the TF memory card and rechargeable battery into the camera.

3.2 Charging the Battery

Connect the camera to a power source using the provided Type C cable. The charging indicator will illuminate during charging and turn off when fully charged. It is recommended to fully charge both batteries before first use.

4. OPERATING INSTRUCTIONS

4.1 Power On/Off

Press and hold the power button located on the top of the camera to turn it on or off.

4.2 Autofocus

The camera features an advanced 64MP autofocus system. To achieve sharp and clear images, gently press the shutter button halfway down. The camera will automatically adjust focus. Once focus is locked (indicated by a green frame on the screen), press the shutter button fully to capture the photo.

Demonstration of the innovative 64MP autofocus feature, showing how pressing the shutter halfway achieves sharper images.

4.3 180° Flip Screen

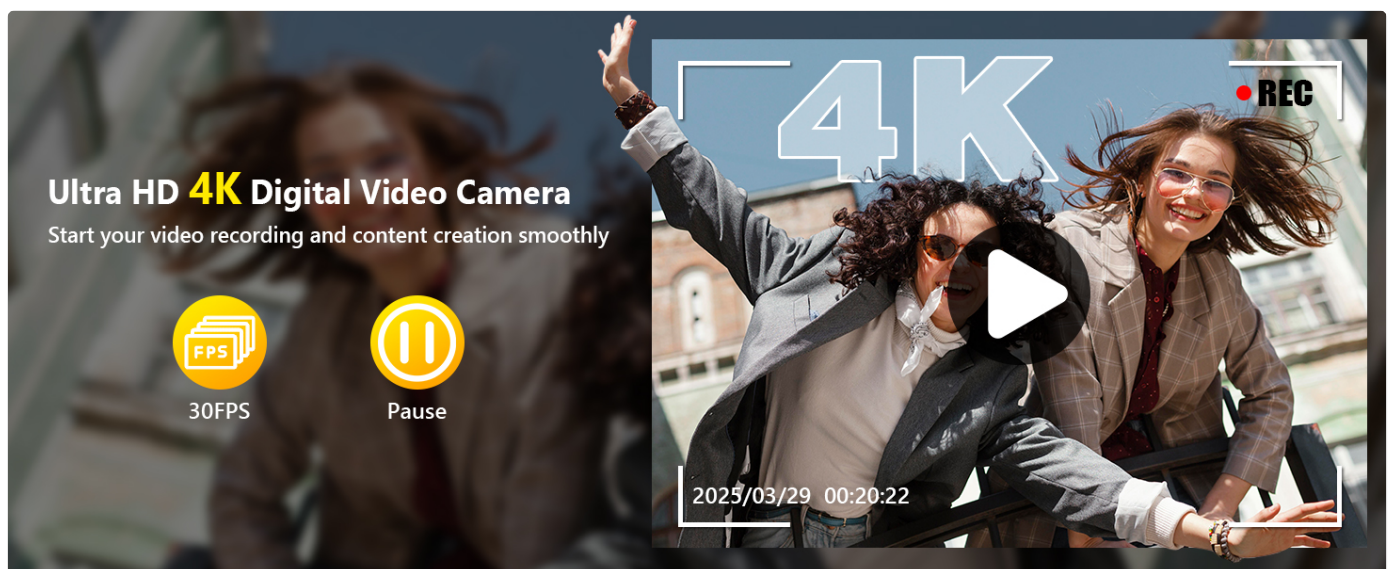

The 3.0-inch IPS screen can be flipped 180 degrees, making it ideal for self-portraits, vlogging, and monitoring your shots while in front of the camera.

The 3.0-inch 180° flip screen in action, demonstrating its utility for easy selfies and vlogging.

4.4 Digital Zoom

Utilize the 16X digital zoom to bring distant subjects closer. Adjust the zoom using the zoom lever on the camera body. Note that digital zoom may reduce image quality compared to optical zoom.

A visual representation of the 16X digital zoom capability, showing progressive magnification of a distant lighthouse.

4.5 Flashlight and Hotshoe

The camera features a built-in flashlight for illuminating subjects in low-light conditions. Additionally, a hotshoe mount is available for connecting external fill lights or microphones (sold separately) to enhance your recording setup.

How to **Connect** Via WIFI?

- 1. Long-press the camera's MENU button to enable the camera's WiFi.
- 2. Open the Wi-Fi settings of your phone, and connect to the Wi-Fi SSID named "DC102W-xxxx" and enter the password.
- 3. Start the App Viipulse and click "Add Camera"
- 4. Once added, you can access the camera's photos and videos!

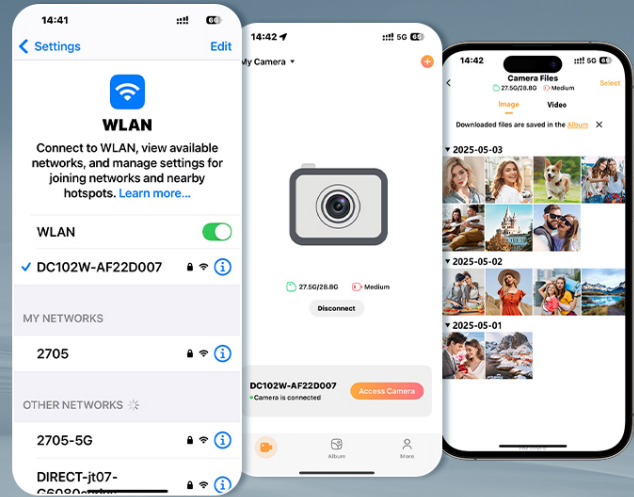

Illustration of the camera's hotshoe for external accessories and the effect of the built-in flashlight in low light.

4.6 Webcam Functionality

Connect the camera to your computer via the Type C cable to use it as a webcam for live streaming, video calls, or online meetings. Select 'PC Camera' mode on the camera when prompted.

4.7 Special Features

- **Time-Lapse Recording:** Capture sequences of images over time to create dynamic time-lapse videos.
- **Slow Motion:** Record videos in slow motion for dramatic effects.
- **Video Pause:** Pause and resume video recording within a single file, simplifying editing.
- **Anti-Shake:** Digital image stabilization helps reduce blur caused by camera movement, ensuring stable and clear pictures.
- **Filters & Exposure Compensation:** Apply various creative filters and adjust exposure compensation to fine-tune your photos.
- **Continuous Shooting:** Capture a rapid sequence of photos by holding down the shutter button.
- **Self-Timer:** Set a delay (2s, 5s, 10s) before the photo is taken, allowing you to get into the frame.
- **Smile & Face Detection:** The camera can automatically detect smiles and faces to optimize focus and exposure.
- **Beauty Face:** Enhance facial features in photos for a more flattering look.

Detailed steps on how to connect the camera to a smartphone using WiFi, including app interface examples.

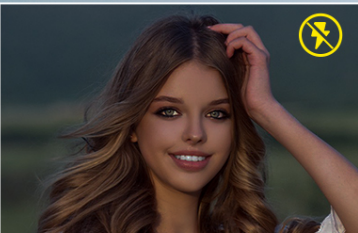

Downloading Files to Computer:

Connect the camera with your computer via the USB C cable. Then, select "MSDS" mode on the camera screen to access your files for easy download.

Hotshoe & Flashlight

Hotshoe can be connected with an external fill light or microphone.

Built-in Flashlight ensures clear pictures even in low light conditions

Instructions on how to connect the camera to a computer using a USB-C cable for easy file transfer.

5. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the camera body. For the lens, use a specialized lens cleaning cloth and solution. Avoid harsh chemicals.
- **Storage:** Store the camera in a cool, dry place away from direct sunlight and extreme temperatures. Remove batteries if storing for extended periods.
- **Battery Care:** Do not expose batteries to high temperatures or dispose of them in fire. Use only the provided charger and batteries.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Camera does not power on	Battery is dead or incorrectly inserted.	Charge the battery or reinsert it correctly.
Cannot take photos/videos	Memory card is full, locked, or not inserted.	Delete files, unlock the card, or insert it properly.
Images are blurry	Autofocus failed, camera shake, or dirty lens.	Ensure autofocus locks, use anti-shake, clean lens.
WiFi connection issues	Incorrect password, app not running, or signal interference.	Re-enter password, restart app/camera, move closer to camera.
