4. Setup and Assembly Instructions

Assembly of this bed frame requires careful attention to detail and may take several hours. It is highly recommended to have a second person assist with the assembly process for ease and safety.

4.1. Before You Begin

- **Clear the Area:** Ensure you have ample space to work in the room where the bed will be placed.
- **Unpack Carefully:** Open all boxes and lay out the components on a soft, clean surface (e.g., a rug or blanket) to prevent scratches.
- **Identify Parts:** Match all parts against the included parts list and diagrams. All parts are typically labeled.
- **Gather Tools:** You will need a Phillips head screwdriver, and potentially a rubber mallet. An Allen wrench is usually provided.

4.2. Assembly Steps (General Overview)

Follow the step-by-step instructions and diagrams provided in your product's specific assembly manual. The general sequence is as follows:

1. **Assemble the Headboard:** Attach the headboard panels and supports as per the diagrams. Ensure all connections are snug.
2. **Construct the Storage Bench/Footboard:** Assemble the main frame of the storage bench, including the drawer housings.
3. **Attach Side Rails:** Connect the side rails to the headboard and the storage bench/footboard. Ensure the bed frame is square and stable.
4. **Install Center Supports:** Place and secure any central support beams and legs to provide additional stability for the mattress.
5. **Place Slats:** Lay the wooden slats across the side rails and secure them according to the instructions. These slats provide direct support for your mattress, eliminating the need for a box spring.
6. **Assemble Drawers:** Construct the four storage drawers. Attach drawer slides to the drawer boxes and the storage bench frame.
7. **Insert Drawers:** Carefully slide the assembled drawers into their respective compartments in the storage bench.
8. **Final Check:** Double-check all bolts, screws, and connections to ensure they are tight and secure.

Note: *Do not overtighten screws, especially those connecting wooden components, as this can cause stripping or cracking.*
