4. MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your Dyson Supersonic r™ hair dryer.

Cleaning the Filter:

The filter should be cleaned regularly to prevent dust and hair buildup, which can affect performance. Refer to the diagram below for filter location.

1. Ensure the dryer is unplugged from the power outlet.
2. Gently twist and pull off the filter cage located at the bottom of the handle.
3. Wipe the filter mesh with a soft, dry cloth to remove any dust or debris. Do not use water or cleaning agents.
4. Reattach the filter cage by aligning it and twisting until it clicks into place.

Cleaning Attachments:

Wipe attachments with a damp cloth as needed to remove any product residue or dust. Ensure they are completely dry

before reattaching to the dryer.

Storage:

Store the hair dryer and its attachments in a clean, dry place away from direct sunlight and extreme temperatures. Avoid wrapping the cord tightly around the dryer, as this can cause damage over time.
