6. MAINTENANCE

Regular maintenance will help prolong the life and appearance of your bed frame.

- **Cleaning the Velvet Upholstery:** Gently vacuum the velvet fabric regularly to remove dust. For spills, blot immediately with a clean, dry cloth. For deeper cleaning, use a mild fabric cleaner specifically designed for velvet,

testing on an inconspicuous area first.

- **Cleaning the Metal Frame:** Wipe the metal frame with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- **Checking Connections:** Periodically check all screws and bolts to ensure they remain tight. Retighten if necessary to maintain stability and prevent squeaking.
- **Electrical Components:** Ensure the charging station and LED light connections are secure. Do not attempt to repair electrical components yourself; contact qualified personnel if issues arise.

7. TROUBLESHOOTING

If you encounter any issues with your bed frame, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Bed frame is wobbly or noisy.	Loose connections; uneven floor.	Ensure all bolts and screws are securely tightened. Use the adjustable feet to level the bed frame on uneven surfaces.
LED lights are not working.	Power connection issue; remote/app not paired; faulty LED strip.	Check if the power adapter is securely plugged into the wall outlet and the LED strip. Ensure the remote control has working batteries and is paired correctly. Try controlling via the app. If issues persist, contact customer support.
Charging station not providing power.	Power outlet issue; loose connection; device compatibility.	Verify the bed frame's main power cord is plugged into a working wall outlet. Check the connection of the charging station module. Ensure your device is compatible with the USB/Type-C output specifications.
Assembly difficulties (e.g., screws not fitting).	Incorrect part usage; misaligned holes.	Double-check the part numbers and orientation against the Installation Manual. Do not force screws; ensure holes are properly aligned before tightening. If parts are damaged or missing, contact customer support for replacements.
