## SETUP AND ASSEMBLY

Assembly is required for these barstools. It is recommended to assemble on a soft, clean surface to prevent scratching. Estimated assembly time: under 15 minutes per stool.

- Unpack Components:** Carefully remove all parts from the packaging. Lay them out on a protected surface.
- Attach Swivel Plate to Seat:** Align the swivel plate (C) with the pre-drilled holes on the underside of the seat cushion (A). Secure using the provided bolts and washers from the hardware pack (E). Do not overtighten.
- Attach Leg Frame to Swivel Plate:** Connect the leg frame assembly (B) to the swivel plate (C) using the remaining bolts and washers from the hardware pack (E). Ensure the leg frame is oriented correctly so the footrest attachment points face inwards.
- Install Footrest Ring:** Insert the footrest ring (D) into the designated slots on the leg frame assembly (B). Secure with the provided screws. Ensure the ring is level and stable.
- Final Tightening:** Once all parts are loosely assembled, carefully place the stool upright. Apply gentle pressure to the seat and then progressively tighten all bolts and screws using the Allen wrench. Do not overtighten to avoid damaging the components.
