BENYAR 5179

BENYAR 5179 Men's Automatic Mechanical Watch Instruction Manual

1. PRODUCT OVERVIEW

The BENYAR 5179 is a men's automatic mechanical watch designed for durability and style. It features a self-winding movement, a rotatable aluminum bezel, and a stainless steel strap. The watch is built to be robust and wear-resistant, suitable for daily wear.

Key Features:

- **Movement:** G2666Z Self-Winding Automatic Mechanical Movement
- **Bezel:** Unidirectional Rotatable Aluminium Bezel with oversized square hour markers
- **Strap:** Polished 316L Stainless Steel Bracelet with unilateral folding clasp
- **Luminescence:** Eco-friendly luminescent coating on indexes and hands
- **Water Resistance:** Up to 100 meters (10 BAR)

2. SETUP AND INITIAL USE

2.1 Winding the Watch

As an automatic mechanical watch, the BENYAR 5179 is powered by the motion of your wrist. For initial use or if the watch has stopped due to lack of wear, it needs to be manually wound.

1. Ensure the crown is in the fully pushed-in position (position 0).
2. Rotate the crown clockwise approximately 20-30 times. This will provide enough power reserve to start the watch.

3. Once worn, the natural motion of your arm will continue to wind the watch.

2.2 Setting the Time

1. Gently pull the crown out to position 1.
2. Rotate the crown clockwise or counter-clockwise to set the desired time.
3. Once the time is set, push the crown back into position 0 to secure it and resume normal operation.

2.3 Adjusting the Stainless Steel Strap

The 240mm long stainless steel strap can be adjusted to fit your wrist size. A strap adjuster tool is included with your watch.

1. Identify the pins on the side of the strap links.
2. Use the included strap adjuster tool to push out the pins from the links you wish to remove.
3. Remove the desired number of links to achieve a comfortable fit.
4. Reinsert the pins to secure the strap.

3. OPERATING INSTRUCTIONS

3.1 Automatic Movement

The G2666Z self-winding movement in your BENYAR 5179 watch harnesses kinetic energy from your daily activities. When worn regularly, the watch will maintain its power reserve without manual winding.

3.2 Using the Rotatable Bezel

The unidirectional rotatable aluminum bezel can be used for timing events up to 60 minutes. To use:

1. Rotate the bezel counter-clockwise until the zero marker aligns with the minute hand.
2. As time passes, the minute hand will point to the elapsed time on the bezel.

Figure 3: Close-up of the watch dial and rotatable bezel, showing the luminous markers and hands.

3.3 Luminous Display

The watch features an eco-friendly luminescent coating on its indexes and hands, allowing for clear time reading in low-light conditions. Exposure to light will charge the luminescence.

4. MAINTENANCE AND CARE

- **Cleaning:** It is strongly recommended to clean the watch band regularly with a soft, dry cloth to maintain its appearance and hygiene.
- **Water Exposure:** While the watch is water-resistant up to 100 meters (10 BAR) for activities like

washing hands, rain, and swimming, avoid pressing any buttons underwater. Do not wear this watch for hot baths or long-term underwater activities such as diving, as excessive water immersion can shorten the watch's lifespan.

- **Temperature:** Avoid exposing the watch to extremely hot or cold temperatures.
- **Impact:** Protect the watch from strong impacts or shocks.

5. TROUBLESHOOTING

If your BENYAR 5179 watch is not functioning as expected, consider the following:

- **Watch Not Running:** If the watch has stopped, it may require manual winding. Follow the steps in Section 2.1 to manually wind the watch. Ensure it is worn regularly to maintain its power reserve.
- **Time Inaccuracy:** Minor variations in timekeeping are normal for mechanical watches. If the inaccuracy is significant, ensure the watch is fully wound and has not been exposed to strong magnetic fields.
- **Water Resistance Concerns:** Always ensure the crown is fully pushed in before any contact with water. If water condensation appears inside the watch, contact support immediately.

For further assistance, please refer to the [Warranty & Support](#) section.

6. SPECIFICATIONS

Feature	Specification
Model Number	BY5179-TYBY
Movement	G2666Z Self-Winding Automatic Mechanical
Case Thickness	16mm
Dial Diameter	42mm
Band Material	Stainless Steel
Band Length	240mm
Band Width	22mm
Dial Window Material	Hardlex
Water Resistance	100 meters (10 BAR)
Clasp Type	Safety Folding Clasp

The watch features a display case back, allowing visibility of the automatic movement's intricate gears and components.

7. WARRANTY AND SUPPORT

7.1 Warranty Information

Your BENYAR automatic mechanical watch comes with a **1-year warranty** from the date of purchase. This warranty covers manufacturing defects under normal use.

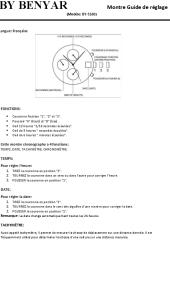

7.2 Return Policy

We offer **30-day free returns** from the date of purchase. Please ensure the watch is in its original condition and packaging for returns.

7.3 Customer Support

If you encounter any issues or have questions regarding your watch, please do not hesitate to contact us. Our customer support team is available to assist you.
