TMKB Technology Mechanical KeyBoard T61SE M1SE Combo

TMKB T61SE 60% Mechanical Gaming Keyboard and M1SE Gaming Mouse Combo User Manual

Introduction

This manual provides detailed instructions for the setup, operation, maintenance, and troubleshooting of your TMKB T61SE 60% Mechanical Gaming Keyboard and M1SE Gaming Mouse Combo. Please read this manual thoroughly to ensure optimal performance and longevity of your devices.

What's in the Box

- TMKB T61SE 60% Mechanical Gaming Keyboard
- TMKB M1SE Gaming Mouse
- USB-C Cable (for keyboard)

Setup

Connecting the Keyboard and Mouse

1. Locate the detachable USB-C cable. Connect the USB-C end to the port on the TMKB T61SE keyboard.
2. Connect the standard USB-A end of the cable to an available USB port on your computer.
3. The TMKB M1SE gaming mouse features an attached paracord USB cable. Connect this USB-A cable to another available USB port on your computer.
4. Your computer should automatically detect and install the necessary drivers for both devices. No additional software is required for basic functionality.

Operating the TMKB T61SE Keyboard

Basic Functions

- The T61SE features a 60% compact ANSI layout with 61 keys.
- Function keys (F1-F12) and other secondary functions are accessed via the 'Fn' key combination. Refer to the keycap legends for specific combinations.

LED Backlight Customization

The keyboard features 15 onboard LED backlight effects. Use the designated function key combinations to cycle through effects, adjust brightness, and change speed. Specific key combinations are typically marked on the keycaps or detailed in a quick start guide.

Key Switches and Keycaps

The T61SE is equipped with clicky blue mechanical switches, providing tactile and audible feedback with each keystroke. The keycaps are double-shot molded, ensuring legends remain clear and visible even with prolonged use and backlighting.

Ergonomic Design

The keyboard features two-stage foldable feet on the underside, allowing you to adjust the typing angle for improved ergonomics and comfort.

Operating the TMKB M1SE Mouse

DPI Adjustment

The M1SE mouse features a high-precision optical sensor with a DPI range of 200-12,800. Use the dedicated DPI button (typically located behind the scroll wheel) to cycle through preset DPI levels. An indicator light may change color to show the current DPI setting.

Programmable Buttons and RGB Lighting

The M1SE mouse includes six programmable buttons. For advanced customization, including button remapping, macro creation, and RGB lighting effects (16.8 million colors), download and install the official TMKB software from the manufacturer's website. The software allows synchronization of lighting with in-game sounds or music.

Image: The TMKB M1SE ultra-light honeycomb gaming mouse, highlighting its key features such as honeycomb design, 6 programmable buttons, 75g ultra-light body, ergonomic design, 200-12800 DPI, high-quality paracord cable, and 50 million click lifespan.

Maintenance

Cleaning the Keyboard

- Disconnect the keyboard from your computer before cleaning.
- Use a can of compressed air to remove dust and debris from between the keycaps.
- Wipe the keycaps and keyboard surface with a soft, slightly damp, lint-free cloth. Avoid excessive moisture.
- Do not use harsh chemicals, solvents, or abrasive cleaners.

Cleaning the Mouse

- Disconnect the mouse from your computer before cleaning.
- Use a soft, dry cloth to wipe the surface of the mouse. For the honeycomb shell, a soft brush can help remove dust.

- Clean the optical sensor on the underside with a cotton swab lightly dampened with isopropyl alcohol, if necessary.
- Ensure the mouse is completely dry before reconnecting.

Troubleshooting

Keyboard/Mouse Not Responding

- Ensure both USB cables are securely connected to your computer's USB ports.
- Try connecting the devices to different USB ports on your computer.
- Restart your computer.
- Test the devices on another computer to determine if the issue is with the devices or your system.

Keyboard Backlight Not Working

- Ensure the keyboard is properly connected.
- Check if the backlight has been turned off using the keyboard's function key combinations. Refer to the quick start guide for specific keys.
- If using custom software, ensure settings are correctly applied.

Mouse Tracking Issues

- Clean the optical sensor on the underside of the mouse.
- Ensure you are using the mouse on a suitable surface (e.g., a mouse pad). Highly reflective or uneven surfaces can affect tracking.
- Adjust the DPI settings to a different level.
