# ACEZUK M05-US Jump Starter with Air Compressor Instruction Manual

Model: M05-US | Brand: ACEZUK

## INTRODUCTION

Thank you for choosing the ACEZUK M05-US Jump Starter with Air Compressor. This versatile device is designed to provide powerful jump-starting capabilities, precise tire inflation, and portable power for your electronic devices. Please read this manual thoroughly before use to ensure safe and optimal operation.

## WHAT'S INCLUDED

- 1x ACEZUK Jump Starter with Air Compressor
- 1x Smart Jumper Cables
- 1x Air Pump Hose
- 4x Gas Nozzles
- 1x Charging Cable (Type-C)
- 1x User Manual
- 1x Portable EVA Carrying Case

## PRODUCT FEATURES

### Powerful Performance, Instant Start

Engineered with a monstrous 8000A peak current, this jump starter transcends ordinary performance, igniting engines of heavy-duty trucks, SUVs, or off-road beasts with commanding ease—even in bone-chilling winters or sweltering desert heat. When frostbite threatens your battery or an unexpected failure leaves you stranded, this rescue-ready powerhouse turns despair into action, propelling you from helplessness to road-ready.

The ACEZUK M05-US Jump Starter with included smart jumper cables and carrying case.

## 150 PSI Tire Inflation Function

Beyond its jump-starting capabilities, this device includes a high-performance air compressor for inflating tires with precision. 5 inflation modes (MAX 150PSI, with auto parameter memorization), 4 optional units, and 4 nozzles for wide applications (cars, motorcycles, bikes, balls, etc). The real-time pressure display helps maintain optimal tire pressure for safer driving.

# 81WH MOBILE POWER

## Smart and Simple

With an intuitive LCD screen and user-friendly interface, this jump starter is effortless to operate. Monitor battery levels, voltage, and tire pressure at a glance. Whether you're a seasoned driver or a first-time user, it's designed to make your life easier and stress-free.

# 8 TYPES OF PROTECTION

Mistake-proof design

The clear LCD screen provides essential information at a glance.

## Emergency Light & Portable Power Bank

M05 jump starter features a bright LED light with multiple modes (steady, strobe, SOS), making it a versatile tool for emergencies, outdoor adventures, or daily use. The car jump starter has a 21800mAh cell capacity, designed with several ports (5V/3A) can fill up your cell phone, tablet, earphones, drone, smart watches and other mobile devices at the fastest speed.

## Compact and Easy to Carry

Crafted with high-quality materials and advanced safety features, this jump starter offers protection against overcharging, overheating, and short circuits. Designed for convenience, this jump starter is lightweight and compact, making it easy to store in your vehicle without taking up much space. The included carrying case adds portability, ensuring it's always within reach when you need it most.

# SETUP GUIDE

## 1. Initial Charge

Before first use, fully charge the ACEZUK M05-US unit. Connect the provided charging cable to the unit's input port and a suitable USB power adapter (not included). The LCD screen will indicate charging progress. A full charge is recommended for optimal performance.

## 2. Power On/Off

Locate the ON/OFF switch on the side of the unit. Slide it to the "ON" position to power on the device. To power off, slide the switch to "OFF".

## 3. Understanding the Display

The intuitive LCD screen displays battery levels, voltage, and tire pressure. Familiarize yourself with the icons for different inflation modes (car, motorcycle, bicycle, ball).

# OPERATING INSTRUCTIONS

## 1. Jump Starting a Vehicle

1. Ensure the jump starter is fully charged.
2. Connect the smart jumper cables to the jump starter's output port.
3. Attach the red clamp to the positive (+) terminal of the vehicle's battery and the black clamp to the negative (-) terminal.
4. Ensure the clamps are securely connected. The smart cable's indicator light will show readiness.
5. Start your vehicle.
6. Once the vehicle starts, immediately remove the jumper clamps from the battery, then disconnect the smart cable from the jump starter.

## 2. Inflating Tires

1. Turn on the unit.
2. Connect the air pump hose to the unit's inflation port.
3. Attach the other end of the hose to the tire valve.
4. Press the "M" button to cycle through inflation modes (car, motorcycle, bicycle, ball) and select the appropriate one.
5. Use the "+" and "-" buttons to set the desired PSI.
6. Press the "OK" button to start inflation. The unit will automatically stop when the preset pressure is reached.
7. Disconnect the hose from the tire valve and the unit.

## 3. Using as a Power Bank

1. Connect your electronic device to one of the USB output ports (5V/3A) on the unit using your device's charging cable.
2. The unit will automatically begin charging your device.

## 4. Using the LED Light

1. With the unit powered on, press the light button to activate the steady bright light.

- 2. Press again to cycle through strobe and SOS modes.
- 3. Press a third time to turn off the light.

## MAINTENANCE AND CARE

- Store the unit in its portable EVA carrying case in a cool, dry place when not in use.
- Avoid exposing the unit to extreme temperatures or direct sunlight for prolonged periods.
- Clean the unit with a soft, dry cloth. Do not use harsh chemicals or abrasive cleaners.
- Regularly check the battery level and recharge the unit every 3-6 months to maintain battery health, even if not used.
- Inspect jumper cables and air hose for any signs of wear or damage before each use.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Unit does not power on.	Battery is depleted.	Charge the unit fully.
Vehicle does not jump start.	Incorrect cable connection; Battery severely discharged.	Ensure clamps are correctly attached to battery terminals. Try again after a few minutes. If battery is completely dead, it may require professional assistance.
Tire not inflating.	Hose not securely connected; Incorrect pressure setting; Valve stem issue.	Check hose connection to unit and tire valve. Verify PSI setting. Inspect tire valve for damage.
LCD screen not responding.	Unit malfunction; Extreme temperature.	Power off and restart the unit. Ensure unit is within operating temperature range. Contact customer service if issue persists.
