Papablic PAPA323AB

Papablic Glass Formula and Breastmilk Pitcher Instruction Manual

Model: PAPA323AB | Brand: Papablic

INTRODUCTION

Thank you for choosing the Papablic Glass Formula and Breastmilk Pitcher. This pitcher is designed to simplify the preparation and storage of baby formula and breastmilk, ensuring a smooth, clump-free consistency for your baby's feeding. Made with durable, BPA-free materials, it offers a safe and convenient solution for daily use.

PRODUCT COMPONENTS

The Papablic Glass Formula and Breastmilk Pitcher includes the following components:

- **Glass Pitcher:** A heavy-duty glass mason jar with measurement markings.
- **Mixing Handle Lid:** A BPA-free, food-grade lid with an integrated mixing handle and a flip-lock spout.

BPA-Free

Food-Grade Safety Certification Approved

IMPORTANT SAFETY INFORMATION

- Use water below 70°C / 158°F when preparing formula in the glass pitcher to prevent damage to the pitcher or its contents.
- Avoid sudden temperature changes to the glass pitcher.
- The lid is top-rack dishwasher safe.
- Do not place the lid in high-heat drying cabinets or direct dry-heat sterilization equipment.
- Ensure all components are clean and dry before assembly and use.

SETUP

Before first use, and after each subsequent use, disassemble all components and wash them thoroughly. Refer to the Cleaning and Maintenance section for detailed instructions.

1. Unpack all components: glass pitcher, mixing handle lid.
2. Wash all parts with warm, soapy water or place them on the top rack of your dishwasher.

3. Rinse thoroughly and allow to air dry completely before reassembly.
4. Ensure the silicone seal is properly seated within the lid to prevent leaks.

OPERATING INSTRUCTIONS

For Breastmilk Storage and Mixing (Pitcher Method)

The pitcher method allows for efficient collection and mixing of breastmilk pumped throughout the day.

1. **Collect Breastmilk:** Pour freshly expressed breastmilk into the glass pitcher. You can add milk from different pumping sessions throughout the day, ensuring each new addition is at the same temperature as the milk already in the pitcher (e.g., all refrigerated).
2. **Gentle Mixing:** When ready to use or before dispensing, gently operate the mixing handle by moving it up and down. This remixes the milk layers (foremilk and hindmilk) without creating excessive foam or air bubbles.
3. **Dispense into Bottles:** Open the flip-lock spout and pour the mixed breastmilk into baby bottles for feeding or into storage bags for freezing.

Image: Visual guide for simplifying breastmilk preparation: 1. Collect Breastmilk, 2. Gentle Mix, 3. Dispense into Bottles.

For Formula Preparation

Prepare baby formula quickly and efficiently with reduced clumps and air bubbles.

1. **Add Warm Water:** Pour the desired amount of warm water (below 70°C / 158°F) into the glass pitcher. For optimal mixing, fill liquid only to the 24 oz line.
2. **Add Formula:** Add the appropriate number of scoops of powdered formula according to the formula manufacturer's instructions.
3. **Mix:** Secure the lid and gently operate the mixing handle by moving it up and down until the formula is thoroughly dissolved and clump-free.
4. **Serve:** Open the flip-lock spout and pour the prepared formula into baby bottles for immediate feeding. Store any remaining formula in the refrigerator according to formula manufacturer guidelines.

Dishwasher Safe

Durable in Various Settings

⚠ Please Avoid Microwave Use

Efficient Mixing — No Lumping

Formula Prep, Storage & Healthy Feeding

Image: The Papablic pitcher provides efficient, lump-free mixing for formula preparation, compared to other methods that may leave residual lumps.

CLEANING AND MAINTENANCE

Proper cleaning ensures hygiene and extends the life of your pitcher.

1. **Disassembly:** Separate the lid from the glass pitcher. The mixing handle can be removed from the lid for thorough cleaning.
2. **Washing:** Wash all components with warm, soapy water. Use a bottle brush for the interior of the pitcher and small brushes for the lid and mixing mechanism to ensure all residue is removed.
3. **Dishwasher Safe:** Both the glass pitcher and the lid are top-rack dishwasher safe.
4. **Drying:** Allow all parts to air dry completely before reassembly or storage.
5. **Storage:** Store the clean, dry pitcher in a cool, dry place.

Dishwasher Safe

⚠️ Avoid Microwave Use

Image: The Papablic pitcher and its lid are dishwasher safe for convenient cleaning. Avoid microwave use.

TROUBLESHOOTING

If you encounter any issues with your Papablic Glass Formula and Breastmilk Pitcher, please refer to the following common solutions:

- **Mixer is stuck or not spinning:** Ensure the mixing handle is correctly inserted into the lid and that no dried residue is obstructing its movement. Disassemble, clean thoroughly, and reassemble. If the issue persists, contact customer support.
- **Leaking from the lid:** Check that the silicone seal is properly seated and free from damage. Ensure the lid is securely fastened to the glass pitcher.

- **Formula clumps:** Ensure water temperature is appropriate (below 70°C / 158°F) and that formula is added to the water, not vice-versa. Operate the mixing handle for a longer duration or with more consistent motion.

SPECIFICATIONS

Feature	Detail
Brand	Papablic
Model Number	PAPA323AB
Material Type	Glass (Pitcher), Plastic (Lid)
Capacity	946.35 Milliliters (approx. 32 oz)
Item Weight	0.66 Kilograms
