8. TROUBLESHOOTING

- Device not charging:

- Ensure the charger is securely plugged into a live power outlet.
 - Verify that the charging cable is properly connected to both the charger and your device.
 - Try using a different cable or port to rule out cable or port issues.
 - Confirm your device is compatible with the charger's output specifications.
- **Slow charging:**
 - Ensure you are using a fast-charging compatible cable.
 - Check the power distribution section (Section 5) to understand how power is shared across multiple ports. Disconnecting other devices may increase charging speed for a single device.
 - Some devices may limit charging speed when the battery is nearly full to preserve battery health.
 - **Charger feels warm:**
 - It is normal for the charger to become warm during operation, especially during high-power charging. The Temp°Guard technology actively manages heat.
 - If the charger becomes excessively hot, disconnect it immediately and contact support.
