5. OPERATING INSTRUCTIONS

5.1 Adjusting the Desk Configuration

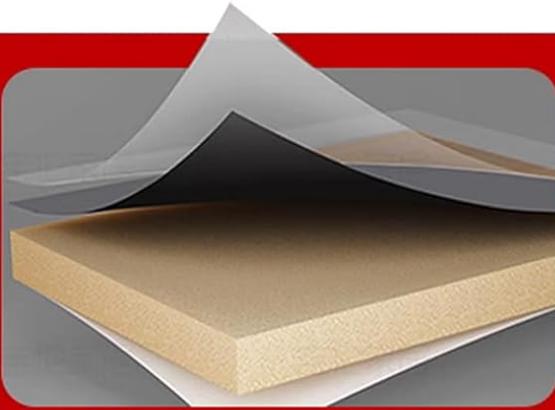

The auxiliary cabinet (drawer unit) is designed to be telescopic, allowing it to be moved freely to change positions. This enables you to adjust the length of the desk, switch the direction of the L-shape, or place it in a corner to maximize space utilization. To adjust, gently slide the desktop section relative to the drawer unit until the desired configuration is achieved. Ensure the desk is stable in its new position before placing items on it.

5.2 Utilizing Storage Drawers

The desk is equipped with six large storage drawers. To open a drawer, apply a gentle pull from the bottom of the drawer front. The drawers feature silent buffer rails for smooth, effortless operation and safety against pinching. These drawers are ideal for organizing folders, books, stationery, and other office or personal essentials.
